Activity #16: Is It Really There?

Apparatus: Semi-transparent Glass, 2 Tacklights, Screen

- Procedure:**
- In this activity, you will use the semi-transparent glass as a mirror.
 - Place the tacklight about 15 cm away from the front of the semi-transparent glass. Turn it on and observe the whole reflection of the tacklight in the glass.
 - Turn the second tacklight (turned-off) and place it behind the glass. While observing the original image from the front of the glass, adjust the second tacklight such that it overlaps the image of the first tacklight which is reflected in.
 - Measure the perpendicular distance of both tacklights from the glass.
 - Remove the second tacklight and turn the screen behind the glass. Try to adjust the position of the screen so that it reflects an image of the tacklight on the screen. Is this possible?
