Reflections Of A Longtime Textbook Author Or History:

Writing World War II Sylvie Murray, Robert D. Johnston, 2025-09-23 An indispensable tool for high schoolers undergraduates or even amateur enthusiasts *Writing World War II* teaches the craft of history writing by example In a series of thoughtful essays Sylvie Murray examines American involvement in World War II and how it has subsequently been portrayed by historians Murray addresses three broad topics the prelude to war the war effort on the home front and the atypical experiences of soldiers in an effort to recapture the mixed emotions of the time and the larger forces shaping public opinion Her work challenges the traditional notions of the greatest generation and the good war and explores viewpoints that have been largely ignored in popular retellings The book serves a dual purpose critiquing the approaches of various historians while at the same time offering Murray's own writing as a model for constructing a persuasive essay But as Murray is rightly critical of one-sided historical arguments *Writing World War II* offers another layer of analysis and instruction throughout At various points in the book her fellow historian Robert D Johnston chimes in to assess Murray's prose demystifying her techniques while helping you to become more critical of all sorts of historical writing including your own

A Century in Books Princeton University Press Staff, 2021-10-12 It all began atop a drugstore in Princeton New Jersey in November 1905 From its modest beginnings Princeton University Press was to become one of the world's most important scholarly publishers embracing a wealth of disciplines that have enriched our cultural academic and scientific landscape Both as a tribute to our authors and to celebrate our centenary Princeton University Press here presents *A Century in Books* This beautifully designed volume highlights 100 of the nearly 8 000 books we have published Necessarily winnowed from a much larger list these books best typify what has been most lasting most defining and most distinctive about our publishing history from Einstein's *The Meaning of Relativity* 1922 to the numerous mathematical and other works that marked the Press's watershed decade of the 1940s including von Neumann and

Morgenstern's Theory of Games and Economic Behavior from milestones of literary criticism by Erich Auerbach and Northrop Frye to George Kennan's Pulitzer Prize winning book on Soviet American relations from Milton Friedman and Anna Jacobson Schwartz's A Monetary History of the United States 1867-1960 to more recent landmarks such as L. Luca Caviglioli's Paolo Menozzi and Alberto Piazza's The History and Geography of Human Genes and Robert Shiller's Irrational Exuberance. In addition to succinct descriptions of the 100 titles and a short introduction on the history of the Press, the book features five essays by prominent scholars and writers. Michael Wood discusses the impact on Princeton University Press of intellectuals who fled Nazi Germany and authored many influential books. Anthony Grafton recounts our rich publishing tradition in history, politics, and culture. Sylvia Nasar traces our evolution into a leading voice in economics publishing. Daniel Kevles reflects on Einstein, a figure of special importance to Princeton. And Lord Robert May writes on our long-standing tradition of publishing in mathematics and science. A Century in Books is more than a celebration of 100 years of publishing at Princeton University Press; it is a treasure trove of 100 years of books that have added to the richness of twentieth-century intellectual life.

History Education in Lebanon and the Borders of the Nation Bouchra Saab, 2025-09-01. This study shows that widely used history textbooks in Lebanon are more standardized and censored than in most liberal democratic countries and relatively similar in form and content to textbooks from Syria and Iraq. A diversity of historical narratives has progressively converged into one dominant narrative which entails a standard definition of the self. In contrast, the other is defined through the exclusion of religious groups considered exogenous and ethnicities considered inferior. In addition, women are marginalized. Surprisingly, the textbooks affiliated with Hezbollah, a Shiite militia financed by the Iranian regime, depart to a certain extent from this definition. While most previous research on Lebanese history textbooks has focused on the diverging narratives of religious communities, this study views these textbooks as the outcome of a tension between two major forces: educational traditions on the one hand and contemporary politics on the other.
