Regional Integration in Africa Jaime De Melo, Yvonne M. Tsikata, 2015 Political motives geography and the uneven distribution of gains trumped the traditional efficiency gains across Africa s Regional Economic Communities RECs The small sparsely populated fragmented and often isolated economies across Africa make a compelling case for these economies to integrate regionally to reap efficiency gains exploit economies of scale and reduce the thickness of borders But lack of complementarities among partners and diminishing returns to the exploitation of resources has reduced supply response to market integration oriented regional policies Additionally a very uneven distribution of resources has sharpened the trade off between the benefits of common

policies needed to tackle cross border externalities and their costs which are heightened by the sharp differences in policy preferences across members African RECs have pursued the linear model of integration with a stepwise integration of goods labour and capital markets as well as eventual monetary and fiscal integration With the exception of the franc zone the RECs have not yet completed goods markets integration the lack of adjustment funds to address the uneven distribution of benefits across partners contributing to the delay Estimates reported here reveal the shortcomings of the linear model of integration as behind the border measures aiming to reduce trade costs were largely ignored across African RECs until recently While this is probably due to the difficulty in gaining the confidence necessary to get collection action started many behind the border measures could still have been undertaken unilaterally

The Enablers of Common Market Implementation Caroline Ntara, Flip Schutte, 2025-09-30 Common market implementation in Africa could potentially alleviate poverty and grow economies However despite numerous trading blocs existing in Africa challenges persist in common market implementation This book investigates the enablers which could make an important difference using the East African Community EAC as a case study Drawing on detailed analysis and extensive original research this book considers the development of East African regional integration which aims to foster collective economic advancement via the free movement of goods people capital services labour and the rights of residence and establishment It suggests that there are various enablers to integration which are often underutilised such as funding models public participation regional decision making models anticorruption initiatives common market laws automated processes sanction mechanisms and research and information symmetry The book argues that correctly harnessing these enablers would have a transformative impact both on the EAC and on other trading blocs in Africa such as the SADC ECOWAS COMESA and AfCFTA This book will be an important read for researchers and practitioners in international trade regional integration African development and economics

The Performance of Africa's International Courts James Thuo Gathii, 2020-11-26 The performance of international courts has traditionally been judged against criteria of compliance and effectiveness Whilst these are clearly desirable objectives for litigants before Africa's international courts this book shows that we must look beyond these criteria to fully appreciate the impact of these courts This book shows how litigants use their participation in international litigation to achieve other objectives to amplify political disputes with their governments to build their movement to educate the public about their cause and to challenge the status quo Chapters in this collection show how these courts act as coordination points for opposition political parties to name and shame dominant parties for violation of their organizational rights Others demonstrate how Africa's international courts serve as transitional justice mechanisms in which truth telling about ongoing conflict and authoritarian governance receives significant attention This attention serves as a platform to galvanize resistance against continued authoritarian rule especially from outside the conflict countries Ultimately the book shows that these courts must be judged against new and broader criteria and understood as increasingly important venues for waging political social environmental and legal
