Emerging issues related to the corona virus pandemic (COVID 19) Seven editors, **Nematology in South Africa: A View from the 21st Century** Hendrika Fourie, Vaughan W. Spaul, Robin K. Jones, Mieke S. Daneel, Dirk De Waele, 2017-02-28 This unique book contains not only a comprehensive up to date summary of the achievements made in all areas of Nematology in South Africa over more than half a century but it also combines this rather technical part with an insiders narrative of how Nematology started and developed It also demonstrates how the South African community of nematologists gradually adapted to major changes in agriculture These were due to a major political shift followed by socio economic changes and this in an often challenging natural environment At the same time this book is conceived as a useful source for young scientists to provide them with practical knowledge and critical insight in the field of Nematology The information given is based primarily on research conducted by nematologists in South Africa Most of this research was aimed at finding workable solutions for nematological problems confronted by both large scale commercial producers and smallholding farmers During a period when funding for scientific research is becoming increasingly scarce the future demand and quest for practical solutions by applied research will only increase **Reflections of South African Student Leaders: 1994 to 2017** Ntokozo Bhengu, Denyse Webbstock, 2020-05-13 Reflections of South African Student Leaders 1994 2017 brings together the reflections of twelve former SRC leaders from across the landscape of South African universities Reviews of the previous volume 1981 2014 suggested that it contributed significantly to a better understanding of the stringent demands of visionary and transformative leadership required by university leaders in the fastchanging and

increasingly complex public higher education sector This volume is based on comprehensive interviews with former student leaders each of whom provided a personal account in their own words of their experience in the position of student leadership The interviewees are from different backgrounds and of diverse political persuasions The book is important for current and future leaders of higher education institutions as it provides insights into the thinking aspirations desires fears and modus operandi of student leaders Such insight can contribute to developing and implementing appropriate strategies for achieving meaningful and constructive engagement with current and future student leaders *Critical toponomy* Peter E Raper,Herman Beyer,Matthias Brenzinger,Theodorus du Plessis,2019-03-01 Critical Toponymy Place names in political historical and commercial landscapes contains a selection of double blind peer reviewed papers from the 4th International Symposium on Place Names that took place 18 20 September 2017 in Windhoek Namibia These papers present current thinking on how the critical turn in social sciences is manifested in toponymic research not only locally but also internationally As such it includes research on place names from South Africa Namibia Zimbabwe Austria Slovenia Central America and even the former Czechoslovakia The contributions show that the etymology of place names are never purely linguistic social political commercial and other factors influence the giving use and adaptations of these linguistic and cultural artefacts Furthermore given their high symbolic content place names also serve as political and commercial currency Place names are therefore important symbolic markers in preserving or changing cultural identities and in marking or facilitating socio political changes and relations Critical Toponymy showcases the many ways in which the representational potential of place names can be deployed in different contexts Scholars as well as practitioners in toponymy and sociolinguistics will find this an illuminating read *Standardisation and the Wealth of Place Names: Aspects of a Delicate Relationship* Chrismi-Rinda Loth, Standardisation and the Wealth of Place Names Aspects of a Delicate Relationship is a selection of double blind peer reviewed papers from the 6th International Symposium on Place Names that took place virtually 29 September 1 October 2021 The symposium explored the issues of multiple place names vis vis processes of standardisation These studies collectively show that there is not a simplistic dichotomy between standardisation and the protection of cultural heritage Some papers grapple with the implications and execution of standardisation processes while others explore the emergence of alternative or unofficial names in response to top down initiatives The matter of signed place names also receives some attention A number of papers excavate the layers of multiple place names thereby contributing to our wealth of toponymic knowledge These proceedings are the product of collaboration between Southern African and international researchers As such it is a valuable resource to local as well as international scholars who are interested in the interdisciplinary field of toponymy **Annual Report of the Education Department** University of the State of New York,1949 **Critical toponomy - Place names in political, historical and commercial landscape** Peter E Raper,Theodorus du Plessis,Matthias Brenzinger,Herman Beyer,2019-03-01 Critical Toponymy Place names in political

historical and commercial landscapes contains a selection of double blind peer reviewed papers from the 4th International Symposium on Place Names that took place 18-20 September 2017 in Windhoek Namibia. These papers present current thinking on how the critical turn in social sciences is manifested in toponymic research not only locally but also internationally. As such it includes research on place names from South Africa, Namibia, Zimbabwe, Austria, Slovenia, Central America and even the former Czechoslovakia. The contributions show that the etymology of place names are never purely linguistic; social, political, commercial and other factors influence the giving, use and adaptations of these linguistic and cultural artefacts. Furthermore, given their high symbolic content, place names also serve as political and commercial currency. Place names are therefore important symbolic markers in preserving or changing cultural identities and in marking or facilitating socio-political changes and relations. Critical Toponymy showcases the many ways in which the representational potential of place names can be deployed in different contexts. Scholars as well as practitioners in toponymy and sociolinguistics will find this an illuminating read.
