The Urban Ecologies of Divided Cities Amira Osman, John Nagle, Sabyasachi Tripathi, 2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers

Current Topics in the Utilization of Clay in Industrial and Medical Applications Mansoor Zoveidavianpoor, 2018 Clay and clay minerals have always been used since the ancient times

for making ceramic materials and also as a building material Over the past decades there has been a growing trend in their applicability in different areas such as industries environmental remediation and water treatment sectors The growing trend is mainly associated with the fact that they are chemically and mechanically stable have higher specific surface area and cation exchange capacity Furthermore clays can be modified to improve their functionalities in different sectors In this chapter we present a review of the structural mineralogical and chemical properties of clay and the effect of surface modification in their structures We further looked at their applicability in arsenic and fluoride removal in their raw and also in their modified form Although the literature showed that modified clay minerals yields higher adsorption capacity as compared to raw clays little nothing has been reported yet in relation to the cost of modifying clays with chemical species As such new studies should also elaborate on the cost effectiveness of modifying clay minerals with chemical species

Genres of Transition: Literature and Economy in Portuguese-Speaking Southern Africa Thomas Waller, 2024-07-22 This book argues that literary production in Portuguese speaking southern Africa has developed distinctive aesthetic idioms that critically respond to crises of global capitalism and related failures of post colonial governance Drawing from recent research at the intersection of world systems analysis and materialist theories of world literature it identifies and evaluates two generic trends in the post independence literatures of Mozambique and Angola From the mid 1980s to the early 1990s there is a marked tendency in Mozambican literary production towards fictional representations of ghosts spectral effects and gothic narrative techniques In Angola there is an analogous outburst of literary expression from the mid 1990s onwards in which writers increasingly turn towards dystopian images of apocalypse ecological crisis and the disintegration of existing modes of social reproduction Away from a restricted focus on the decline of the post independence Marxist Leninist state the book contends that the upswing in these two genres of writing functions to critically register a world systemic horizon that both surpasses and includes locally determined national realities The patterned repetition of spectral and dystopian forms in Portuguese speaking southern Africa occurred at a time of heightened capitalisation in which the region was subjected to newly expropriative forms of accumulation and ecological enclosure via integration into a reconstellated world system headed by neoliberal finance capital Through close readings of texts by authors such as Mia Couto Suleiman Cassamo Ungulani Ba Ka Khosa Pepetela and Ondjaki this book asks What factors drove literary production towards the figure of the spectre in Mozambique and towards dystopia in Angola What emerging energies and social contradictions found shape in these generic idioms in ways that existing vocabularies were unable to express What does the geo temporal passage from spectrality to dystopia tell us about the history of capitalist development in southern Africa and about the restructuring of political economic parameters across the globe

Alternative Feed Ingredients for Sustainable Livestock Production Juana Catarina Cariri Chagas, Gabriel Da Silva Viana, Marcos Inacio Marcondes, 2025-08-12 Population growth and rising incomes in developing countries are leading to an increasing demand for animal products As limited possibilities exist to increase the area of arable land food production depends on an increase in crop yield per hectare However more than 70% of global agricultural land is already used to produce feed to support livestock production Moreover the remaining arable land available is used for food and fuel and in the upcoming years due to the consequences of climate change and global warming some of this land will be compromised through droughts and desertification Therefore using ingredients such as non human edible products native

Venda Casada no Mercado Digital - 1ª Ed - 2025 Daniela Copetti Cravo, 2025-01-06. Com grande satisfação que apresento aos leitores esta obra, notável. *Venda Casada no Mercado Digital* de Daniela Copetti Cravo. Reconhecida por sua sólida forma acadêmica e pela brilhante trajetória profissional, a autora nos brinda com um trabalho de fundo que ao mesmo tempo profundo em suas reflexões teóricas e de grande utilidade prática para os operadores do Direito e para todos os que ocupam dos mercados digitais. No livro analisa-se como o *tying*, *venda casada* e o *bundling* (empacotamento) são aplicados em mercados digitais, como por exemplo a inclusão de navegadores web em sistemas operacionais. Nos mercados digitais, a capacidade de integração e interoperabilidade de produtos tecnológicos torna as práticas de *venda casada* mais dinâmicas e menos evidentes. As autoridades de proteção do consumidor e de defesa da concorrência enfrentam desafios para adaptar regras tradicionais a essas novas realidades. Discute-se com muita propriedade o Digital Markets Act (DMA), legislação editada pela União Europeia para combater as práticas de *gatekeepers* (controladores de plataformas digitais) que se valem da *venda casada* para limitar a competição e prejudicar consumidores. Analisa-se também no que diz respeito ao Brasil o Projeto de Lei 2.768/2022, no qual sob a inspiração do DMA busca-se regular o mercado digital a partir de regras para evitar que grandes plataformas digitais abusem de sua posição de

mercado O livro também aborda casos práticos bem como o impacto da integração de serviços digitais nas escolhas dos consumidores trazendo ricos exemplos da complexidade da era digital e deixando claro que para garantir a livre concorrência e a proteção do consumidor necessário promover maior harmonização entre as esferas e as autoridades do Direito da Concorrência e do Direito do Consumidor Além disso o conceito de servitização ou a integração de produtos e serviços em pacotes completos também é debatido Tudo a evidenciar a necessidade de revisões legislativas para lidar com os novos desafios trazidos pela economia digital portanto uma honra e um privilégio apresentar ao público esta obra original e muito bem fundamentada em ampla bibliografia que certamente se tornar uma referência para todos os que se interessam pelo Direito da Concorrência pelo Direito do Consumidor e pela regulação dos mercados digitais Ricardo Villas Bôas Cueva
