The Postnormal Times Reader Ziauddin Sardar, 2019-01-01 IIIT Books In Brief Series is a valuable collection of the Institute's key publications written in condensed form to give readers a core understanding of the main contents of the original Postnormal times are best defined as an in between period where old orthodoxies are dying new ones have yet to be born and very few things seem to make sense or as Ezio Mauro puts it we are hanging between the no

longer and the not yet and thus we are necessary unstable nothing around us is fixed not even our direction of travel The postnormal times theory attempts to make sense of a rapidly changing world where uncertainty is the dominant theme and ignorance has become a valuable community The Postnormal Times Reader is a pioneering anthology of writings on the contradictory complex and chaotic nature of our era It covers the origins theory and methods of postnormal times and examines a host of issues ranging from climate change governance Middle East to religion and science from the perspective of postnormal times By mapping some of the key local and global issues of our transitional age the Reader suggests a way of navigating our turbulent futures *Creative Intelligence in the 21st Century* Don Ambrose, Robert J. Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions Will civilizations thrive or collapse in the decades to come if they are not creative enough or if they are too creative Interest in these questions is growing however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts The book begins with a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress distort and invigorate creativity in general and creative education in particular After that prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world The world's problems are complex messy and seemingly intractable but history tells us that human creativity finds solutions to even the most daunting problems This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today helping chart a path forward for creativity in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University A volume taking on macro opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think big and think forward Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond Ann Robinson Past President National Association for Gifted Children [The Discourse of Scholarly Communication](#) Patrick Gamsby, 2023-08-14 The Discourse of Scholarly Communication examines the place and purpose of modern scholarship and its dialectical relationship with the ethos of Enlightenment Patrick Gamsby argues that while Enlightenment enlightenment is often used in the mottos of numerous academic institutions its historical social and philosophical elements are largely obscured Using a theoretical lens Gamsby revisits the ideals of the Enlightenment alongside the often contradictory issues of disciplinary boundaries access to research academic labor in the production of scholarship author peer reviewer editor and translator the interrelationship of form and content lectures textbooks books and essays and the stewardship of scholarship in academic libraries and archives It is ultimately argued that for the betterment of

the scholarly communication ecosystem and the betterment of society anti Enlightenment rules of scholarship such as publish or perish should be dispensed with in favor of the formulation of a New Enlightenment
