

ANALYSIS OF OBSERVATION(S)

Please use the example of an Analysis of Observation provided as a template for all analysis papers.

Step 1: Summarize what was observed.

1.A. Background Details:

Develop a chart that identifies:

- a. Site Visit Number(s)
- b. Day(s) of the week
- c. Date(s)
- d. Grade level(s)
- e. Subject(s)

1.B. Students

On average, how many students were present during the observation(s)? Based on the observation(s), describe the diversity of the students. Refer to IPTS 1.A for details regarding diversity.

1.C. Adults

How many other adults were in the room? Describe their roles (, parent, co-teacher, teacher's aide, student teacher, special education teacher).

1.D. Summary of Observation(s)

Using your Site Visit Notes and focusing on the appropriate Performance Activity/ies, provide 3–4 sentences summarizing what was observed in each Site Visit. Using the performance activities, provide clear examples which support the given IPTS.

Remember that a summary focuses on retelling the main events of the observation in your own words. No opinion or analysis should be part of your summary.

Step 2: Analyze observation(s) and the connection(s) to the standard/indicator. In this analysis, closely examine the observation(s) to understand the parts and ways they work together. Focus on the connection(s) between the observation(s) and the explicit standard/indicator the observation(s) addressed. Be sure to support all claims with specific examples from the observation(s).

Step 3: Analyze what was observed and its impact on student learning. Using classroom data and anecdotal data from the observation(s), **analyze** the way in which what was observed impacts student learning. Consider the way specific characteristics of students in the observed class(es) (, developmental characteristics, previously demonstrated academic performance/ability and special needs, socio-economic profile, ethnicity/cultural/gender make-up, special needs and language) impact decisions regarding instruction and assessments, especially in terms of the explicit standard on which the observation(s) focused. Provide specific numbers whenever possible. Be sure to support all claims with specific examples from the observation(s).

[Undergraduate Research in Dance](#) Lynnette Young Overby, Jenny Olin Shanahan, Gregory Young, 2024-12-02 Undergraduate Research in Dance A Guide for Students supplies tools for scaffolding research skills alongside examples of undergraduate research in dance scholarship This second edition has been updated throughout for current students with new chapters on mentoring and dance studies Dance can be studied as an expressive embodied art form with physical cognitive and affective domains and as an integral part of society history and vast areas of interdisciplinary content To this end the guidance provided by this book will equip future dance professionals with the means to move the field of dance forward Chapters 1-9 guide students through the fundamentals of research methods providing a foundation to help students get started in understanding research protocols and processes A new chapter 10 provides guidelines for mentoring undergraduate students in dance Chapters 11-21 detail forms of undergraduate research in a rich diversity of fields within dance that are taught in many collegiate dance programs including dance therapy history science psychology education and technology in addition to public scholarship choreography and interdisciplinary topics A new chapter on dance studies has been added to this second edition The book also includes annotated online resources and many of its chapters are supported by examples of abstracts of capstone projects senior theses and conference presentations by undergraduate researchers across the United States and globally Suitable for both professors and students this book is an ideal reference book for dance studies as well as humanities and arts courses intersecting with dance

Observation in the Language Classroom Dick Allwright, 2014-09-25 This book provides an account of classroom observation in a historical and educational perspective Drawing on extracts from classic studies in this field Dick Allwright reviews the development of research and experiment since the 1970 s The book thus not only provides a background to recent research but also identifies areas for future development Stress is laid on the link to be made between practice and research and it is argued that policy making either at classroom or institutional level is heavily dependent on descriptive accounts of classroom reality

Quality Research Papers Nancy Jean Vyhmeister, 2009-06-26 Nancy Vyhmeister s Quality Research Papers is fast becoming a standard reference textbook for writing research papers in the field of religion and theology It takes the student from the beginning assignment of a paper through the research phase to the finished paper This second edition gives improvements and added material for such things as the expanding field of online research and doing church related research in a professional manner Resources for doing research are updated throughout

the book **Undergraduate Research in Art** Vaughan Judge, Jenny Olin Shanahan, Gregory Young, 2018-12-07

Undergraduate Research in Art A Guide for Students supplies tools for scaffolding research skills with examples of undergraduate research activities and case studies on projects in the various areas of the study of art from art history art education and fine art therapy to studio art graphic design and digital media Although art degree programs don't always call it research many undergraduate activities in art have components that could be combined into comprehensive projects The book begins with an overview chapter followed by seven chapters on research skills including literature reviews choosing topics formulating questions citing sources disseminating results and working with data and human subjects A wide variety of subdisciplines follow in Chapters 9 through 18 with sample project ideas from each as well as undergraduate research conference abstracts The final chapter is an annotated guide to online resources that students can access and readily operate Each chapter opens with inspiring quotations and wraps up with applicable discussion questions Professors and students can use *Undergraduate Research in Art* as a text or a reference book

Undergraduate Research in Theatre Michelle Hayford, 2021-07-13 *Undergraduate Research in Theatre* A Guide for Students supplies tools for scaffolding research skills alongside examples of undergraduate research in theatre and performance scholarship The book begins with an overview of the necessity of framing theatre as undergraduate research and responding to calls for revolutionizing the discipline toward greater equity diversity and inclusion Dedicated chapters for the research skills and methods employed by each theatre area follow scripted theatre devised and new works applied theatre scenic costume sound and lighting design and theatre theory and interdisciplinary studies Throughout the book undergraduate research activities are demonstrated by 36 case studies authored by undergraduates from six countries about diverse areas of theatre study Suitable for both professors and students *Undergraduate Research in Theatre* is an ideal resource for any course that has an opportunity for the creation of new knowledge or as an essential interdisciplinary connection between theatre performance and other disciplines

Media Research and Research Paper Writing Mr. Rohit Manglik, 2023-11-23 Teaches methods of media research and academic writing for scholarly publishing *Observational Research in U.S. Classrooms* Hersholt C. Waxman, Roland G. Tharp, R. Soleste Hilberg, 2004-01-26

The present national reform agendas stress that rigorous content and high expectations be accessible to all students including students from groups whose achievement has traditionally lagged behind that of the majority culture students Improving the achievement in US schools important for both social and economic stability will require that instruction be responsive to our nation's increasingly diverse student population This book includes theoretical frameworks as well as substantive research findings and provides examples of recently developed classroom observation instruments based on research of effective teaching practices for culturally and linguistically diverse students Each chapter represents a new aspect of classroom observation research that will assist educators in their endeavors to improve US schools *Infant Observation and Research* Cathy Urwin, Janine Sternberg, 2012 Psychoanalytic infant observation is

frequently used in training psychoanalytic psychotherapists and allied professionals but increasingly its value as a research method is being recognised particularly in understanding developmental processes in vulnerable individuals and groups This book explores the scope of this approach and discusses its strengths and limitations from a methodological and philosophical point of view Infant Observation and Research uses detailed case studies to demonstrate the research potential of the infant observation method Divided into three sections this book covers infant observation as part of the learning process how infant observation can inform understanding and influence practice psychoanalytic infant observation and other methodologies Throughout the book Cathy Urwin Janine Sternberg and their contributors introduce the reader to the nature and value of psychoanalytic infant observation and its range of application This book will therefore interest a range of mental health practitioners concerned with early development and infants emotional relationships as well as academics and researchers in the social sciences and humanities

Towards Design Automation for Additive Manufacturing Anton Wiberg, 2019-10-14 In recent decades the development of computer controlled manufacturing by adding material layer by layer called Additive Manufacturing AM has developed at a rapid pace The technology adds possibilities to the manufacturing of geometries that are not possible or at least not economically feasible to manufacture by more conventional manufacturing methods AM comes with the idea that complexity is free meaning that complex geometries are as expensive to manufacture as simple geometries This is partly true but there remain several design rules that need to be considered before manufacturing The research field Design for Additive Manufacturing DfAM consists

of research that aims to take advantage of the possibilities of AM while considering the limitations of the technique Computer Aided technologies CAX is the name of the usage of methods and software that aim to support a digital product development process CAX includes software and methods for design the evaluation of designs manufacturing support and other things The common goal with all CAX disciplines is to achieve better products at a lower cost and with a shorter development time The work presented in this thesis bridges DfAM with CAX with the aim of achieving design automation for AM The work reviews the current DfAM process and proposes a new integrated DfAM process that considers the functionality and manufacturing of components Selected parts of the proposed process are implemented in a case study in order to evaluate the proposed process In addition a tool that supports part of the design process is developed The proposed design process implements Multidisciplinary Design Optimization MDO with a parametric CAD model that is evaluated from functional and manufacturing perspectives In the implementation a structural component is designed using the MDO framework which includes Computer Aided Engineering CAE models for structural evaluation the calculation of weight and how much support material that needs to be added during manufacturing The component is optimized for the reduction of weight and minimization of support material while the stress levels in the component are constrained The developed tool uses methods for high level Parametric CAD modelling to simplify the creation of parametric CAD models based on Topology Optimization TO results The work concludes that the implementation of CAX technologies in the DfAM process enables a more automated design process with less manual design iterations than traditional DfAM processes It also discusses and presents directions for further research to achieve a fully automated design process for Additive Manufacturing
