**Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners** Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

**Curriculum Development and Review for Democratic Citizenship and Human Rights Education** Tibbitts, Felisa, Council of Europe, 2016-03-01 Education for democratic citizenship and human rights education are vital for peaceful, sustainable, and inclusive societies based on respect for the human rights of every person. Effective teaching and learning processes require well-trained teachers, positive learning environments, and high-quality learning materials. This is underpinned by education policy, including curriculum development and review, which is the main focus of this book. The strengthening of education policies in the fields of education for democratic citizenship and human rights lies at the very heart of the efforts of the Council of Europe, the United Nations Educational Scientific and Cultural Organization, the Office for Democratic Institutions and Human Rights of the Organization for Security and Co-operation in Europe, and the Organization of American States. These organisations have jointly produced this publication in order to support states' commitment to fostering citizenship and human rights education and improving access to quality education for all.

*Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn* Gonsalves, Chahna, Pearson, Jayne, 2023-08-14 Assessment by rubrics has emerged as a tool with great potential to guide successful student learning from a competency-based approach. Rubrics as instruments that make it possible to share the criteria for carrying out learning and assessment tasks with students are excellent roadmaps for student learning, largely because they allow students to know what they are expected to do and what they are expected to achieve by carrying out the learning tasks. *Improving Learning Through Assessment Rubrics: Student Awareness of What and How They Learn* contributes to the improvement of what is being evaluated by identifying the strengths as well as the weaknesses of the didactic use of rubrics in the assessment of university learning. The book also provides a set of theoretical issues, methodological elements, and practical resources for the assessment of university learning using rubrics. Covering topics such as active learning, self-assessment, and teacher identity, this reference work is ideal for administrators, policymakers, researchers, scholars,
