House of Commons,1970 **Nuclear Science Abstracts** ,1965 **Brotherhood of the Bomb** Gregg Herken,2013-08-13 The scientists who made the nuclear bomb are the focus of this detailed engrossing history of one of the greatest scientific discoveries of the 20th century Publishers Weekly The story of the twentieth century is largely the story of the power of science and technology Within that story is the incredible tale of the human conflict between Robert Oppenheimer Ernest Lawrence and Edward Teller the scientists most responsible for the advent of weapons of mass destruction The story of these three men builders of the atomic and hydrogen bombs is fundamentally about loyalty to country to science and to each other and about the wrenching choices that had to be made when these allegiances came into conflict In Brotherhood of the Bomb Gregg Herken gives us the behind the scenes account based upon a decade of research interviews and newly released Freedom of Information Act and Russian documents **The Sale Catalogues of British Government Publications, 1836-1921** Great Britain. Newman,Thomas Ypsilantis,2012-12-06 The International Conference on the History of Original Ideas and Basic Discoveries held at the Ettore Majorana Centre for Scientific Culture in Erice Sicily July 27 August 4 1994 brought together sixty of the leading scientists including many Nobel Laureates in high energy physics principal contributors in other fields of physics such as high Tc superconductivity particle accelerators and detector instrumentation and thirty six talented younger physicists selected from candidates throughout the world The scientific program including 49 lectures and a discussion session on the Status and Future Directions in High Energy Physics was inspired by the conference theme The key experimental discoveries and theoretical breakthroughs of the last 50 years in particle physics and related fields have led us to a powerful description of matter in terms of three quark and three lepton families and four fundamental interactions The most recent generation of experiments at e e and proton proton colliders and corresponding advances in

theoretical calculations have given us remarkably precise determinations of the basic parameters of the electroweak and strong interactions. These developments while showing the striking internal consistency of the Standard Model have also sharpened our view of the many unanswered questions which remain for the next generation: the origin and pattern of particle masses and families, the unification of the interactions including gravity and the relation between the laws of physics and the initial conditions of the universe.

In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent statistical data on such topics as tuition, room and board, admission requirements, financial aid, enrollments, student life, library holdings, accelerated and study abroad programs, departments and teaching staff, buildings and grounds, and degrees conferred. Volume two of the set provides four indexes, including an institutional index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.
