Symons, 2016-01-12 Leading scholars assess the transformations in energy security policy that flow from recognition of global climate change They explore through case studies the key policy responses formulated in the Asia Pacific and identify potential synergies between energy policy and climate mitigation efforts

Climate Vulnerability, 2013-03-15 Climate change has been the subject of thousands of books and magazines scientific journals and newspaper articles daily It's a subject that can be very political and emotional often blurring the lines between fact and fiction The vast majority of research studies projections and recommendations tend to focus on the human influence on climate change and global warming as the result of CO2 emissions often to the exclusion of other threats that include population growth and the stress placed on energy sources due to emerging global affluence *Climate Vulnerability Five Volume Set* seeks to strip away the politics and emotion that surround climate change and will assess the broad range of threats using the bottom up approach including CO2 emissions population growth emerging affluence and many others to our five most critical resources water food ecosystems energy and human health Inclusively determining what these threats are while seeking preventive measures and adaptations is at the heart of this unique reference work Takes a Bottom Up approach addressing climate change and the threat to our key resources at the local level first and globally second providing a more accurate and inclusive approach Includes extensive cross referencing which is key to readers as new connections between factors can be discovered Cuts across a number of disciplines and will appeal to Biological Science Earth Environmental Science Ecology and Social Science comprehensively addressing climate change and other threats to our key resources from multiple perspectives

Green Grabbing: A New Appropriation of Nature James Fairhead, Melissa Leach, Ian Scoones, 2014-10-29 Across the world ecosystems are for sale Green grabbing the appropriation of land and resources for environmental ends is an emerging process of deep and growing significance A vigorous debate on land grabbing already highlights instances where green credentials are called upon to justify appropriations of land for food or fuel Yet in other

cases environmental green agendas are the core drivers and goals of grabs Green grabs may be driven by biodiversity conservation biocarbon sequestration biofuels ecosystem services or ecotourism for example In some cases these agendas involve the wholesale alienation of land and in others the restructuring of rules and authority in the access use and management of resources that may have profoundly alienating effects Green grabbing builds on well known histories of colonial and neo colonial resource alienation in the name of the environment Yet it involves novel forms of valuation commodification and markets for pieces and aspects of nature and an extraordinary new range of actors and alliances This book draws together seventeen original cases from African Asian and Latin American settings to ask To what extent and in what ways do green grabs constitute new forms of appropriation of nature What political and discursive dynamics underpin green grabs How and when do appropriations on the ground emerge out of circulations of green capital What are the implications for ecologies landscapes and livelihoods Who is gaining and who is losing How are agrarian social relations rights and authority being restructured and in whose interests This book was published as a special issue of the Journal of Peasant Studies
