Christopher Slobogin,2006-09-07 This book is written for researchers scholars advanced graduate students and clinicians who work in risk assessment and criminal responsibility It addresses the question of admitting expert testimony from behavioral health experts in determining matters of culpability and dangerousness by examining a number of factors including the source of the expert testimony whether juries need it and whether it is presented as proven or informed in the court It argues that the question cannot be understood as a dualistic matter of being for or against expert testimony rather its highly nuanced arguments show that determining who should be punished and who should be preventively detained must happen through an interdisciplinary process that looks at the specific circumstances of each case It offers an analytic framework for making these determinations that treats culpability and dangerousness not as static ontologically complete entities but rather as socially constructed concepts that cannot be determined solely through the scientific method The book

makes the intriguing argument throughout that although expert testimony cannot be considered scientifically reliable or proven it should nevertheless be included as long as it can be classified and understood as informed speculation because it makes legal factfinders attend more closely to the matters that the law considers pertinent to past mental states. It seeks to reconcile the tension between the law's demand for accuracy and the inability of behavioral science to provide more than speculative answers for most questions raised by the insanity defense and related doctrines and by sentencing commitment and sex offender statutes that require determinations of risk.

Ethics and Philosophical Critique in William James Sarin Marchetti, 2015-08-25 Marchetti offers a revisionist account of James's contribution to moral thought in the light of his pragmatic conception of philosophical activity. He sketches a composite picture of a Jamesian approach to ethics revolving around the key notion and practice of a therapeutic critique of one's ordinary moral convictions and style of moral reasoning.

Philosophy, Psychiatry and Neuroscience Edward M. Hundert, 1989 This book proposes a new unified view of the mind which integrates the insights of philosophers, psychologists and neuroscientists. Through a detailed discussion of major theories from all these and related disciplines, the author gradually reveals fundamental links between these previously unconnected approaches to human thought and experience. The author has studied medicine, philosophy, mathematics and history and is currently a practising psychiatrist and a teacher at the Harvard Medical School. He discusses diverse fields of thought with depth and clarity and his unique perspective should stimulate a re-evaluation of our traditional approaches to the mind.

Observations on Transaction Gerhard Gelbmann, 2002 This book deals with two aspects of interpersonal communication: the content aspect and the relationship aspect. Concepts like meta-communication are analysed as well as reductionism, social system or aspect. The study criticizes approaches toward a Philosophy of Communication which start from notions like Ordinary Language or Language Instinct or Communication as Oriented Toward Mutual Understanding. This essay gives a vivid, sometimes witty and polemical discussion of several points linked to themes like idealisation or systemic concept of person and it proposes an attempt to base a conception of communication on the constructivist's understanding of the term of observation. The way how a comprehension of transaction is shaped proves to be useful for understanding emotions as an element of human life and social interaction.

Poststructuralism and Critical Theory's Second Generation

Alan D. Schrift, 2014-09-11 Poststructuralism and Critical Theory's Second Generation analyses the major themes and developments in a period that brought continental philosophy to the forefront of scholarship in a variety of humanities and social science disciplines and that set the agenda for philosophical thought on the continent and elsewhere from the 1960s to the present. Focusing on the years 1960-1984, the volume examines the major figures associated with poststructuralism and the second generation of critical theory: the two dominant movements that emerged in the 1960s. Althusser, Foucault, Deleuze, Derrida, Lyotard, Irigaray and Habermas. Influential thinkers such as Serres, Bourdieu and Rorty who are not easily placed in standard histories of the period are also covered. Beyond this thematic, essays engage with issues as diverse as the

Nietzschean legacy the linguistic turn in continental thinking the phenomenological inheritance of Gadamer and Ricoeur the influence of psychoanalysis the emergence of feminist thought and a philosophy of sexual difference the renewal of the critical theory tradition and the importation of continental philosophy into literary theory

An Introduction to Integrative Psychotherapy Ken Evans, Maria Gilbert, 2005-05-03 This introductory text provides an invaluable and accessible overview of the rapidly developing field of integrative psychotherapy and offers a relational developmental approach to theory and practice The book goes beyond the confines of the therapy room and explores the significance of the cultural ecological and transpersonal dimensions of therapy by critiquing the philosophical bases underpinning the theoretical model and looking at the nature of resistance in different phases of therapy This textbook is essential to students needing a comprehensive introduction to integrative psychotherapy and will also be of interest to the seasoned practitioner

Relatedness, Self-Definition and Mental Representation John S. Auerbach, Kenneth N. Levy, Carrie E. Schaffer, 2005-07-08 This book presents chapters by Dr Blatt s many colleagues and students that explore questions of relatedness self definition and mental representation and shows us that psychoanalysis and empirical research can be combined

Personal and Relational Construct Psychotherapy Harry Procter, David A. Winter, 2020-09-17 This book introduces Personal and Relational Construct Psychotherapy a development by the authors of an approach to psychotherapy originated in the 1950 s by George A Kelly Drawing on a lifetime of experience in working with people in mental health settings Procter and Winter focus on the crucial relationships that form the context of human struggles and how these can be a fertile resource in problem resolution The book provides step by step descriptions of assessment and therapeutic methods for working with individuals families and groups as well as exploring the philosophical background of the approach its application to formulation supervision and reflective practice its relationships to other models of psychotherapy and its evidence base The book will be invaluable for psychotherapists counsellors and psychologists of all levels and traditions and useful for students and trainees in health education social work and any field involving helping people with the difficulties of everyday life

A History of Philosophy Johann Eduard Erdmann, 1899

The History of Continental Philosophy Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant s philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern

thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike
