

A diagram of a mobile phone with the following labeled components:

- Audio In/Out
- Control
- Antenna Connector
- Speaker
- Microphone
- Display
- Keypad
- Light/Emergency Multifunction Key

1. Attach a charged battery to the twist-on connector on the back of the radio. Ensure that the battery is locked in position.
2. Screw the appropriate antenna (30-60MHz or 30-512MHz) to the TNC antenna connector.
3. Use the Power/Volume Control knob on top of the radio to turn on the radio. Use the same knob to adjust the volume. If a headset or other external audio device is attached, check for function at this time.

Controls: Push-to-Talk (PTT) key, menu and exit/stop key, and monitor key on the left side. A 15-key keypad on the front, and a volume control knob on the top of the radio.

Primary Keys: [Menu Key] opens the radio menu, [Exit Key] exits the menu, [+FREQ-] changes the frequency selected in channel mode, [ENT] switches between Scan(), and, if held down, starts FMS radio operations. Hold down [CLR] to lock/unlock the keypad. Keys (2-9) are for text.

After the radio is turned on, and the initial self-test is successfully completed, the default display appears:

	Signal strength indicator. Shows only during TX or RX of audio.
	Indicates the channel order in channel mode, or menu order when in the menu.
	Displays the RX and TX frequency, FM radio frequency, or menu/text items.
	Narrowband indicator. When this is present, radio is transmitting in narrowband.
	CTCSS indicator. When this is present, the radio is transmitting a CTCSS signal.
	DCS indicator. When this is present, the radio is transmitting a DCS signal.
	Radio RX indicator. When present, the radio is receiving a transmission.
	Power indicator. H is for High Power TX, L is for Low Power TX.
	Dual-Band indicator. When this is blinking dual band standby mode is on.
	VOR indicator. Present when VOR mode is activated.
	Lock indicator. When present, the keypad is locked. Hold [CLR] to unlock/lock.
	Unused display items. Not supported with the current firmware.

TABLE - Transmission / Reception or Transmitting / Receiving. Refers to the radio condition.

Narrowband - A technology that uses a minimal amount of bandwidth. This is the FCC standard for conventional radio and applies within the United States of America.

CTCSS - Continuous Tone-Coded Squelch System
This filters out anyone without the same CTCSS code. This is also referred to as a "toneless code."

BCD - Digital Code Sequence. An expanded version of CDESS. This is also referred to as a 'robust code.'

WDR - Voice Operated Switch. Designed to transmit only when triggered by human speech. Not recommended for use in loud environments.
