Untangling Twinning Maureen L. Condic, 2020-02-28 Scientists and philosophers have long struggled to answer the questions of when human life begins and when human life has inherent value The phenomenon of identical monozygotic twinning presents a significant challenge to the view that human life and human personhood begin at conception The fact that a single embryo can split to generate two or more genetically identical embryos seems to defy the notion that prior to splitting an embryo can be a single human individual In Untangling Twinning Maureen Condic looks at the questions raised by human twinning based on a unique synthesis of molecular developmental biology and Aristotelian philosophy She begins with a brief historical analysis of the current scientific

perspective on the embryo and proceeds to address the major philosophic and scientific concerns regarding human twinning and embryo fusion Is the embryo one human or two or even more Does the original embryo die and if not which of the twins is the original Who are the parents of the twins What do twins chimeras cloning and asexual reproduction in humans mean And what does the science of human embryology say about human ensoulment human individuality and human value Condit's original approach makes a unique contribution to the discussion of human value and human individuality and offers a clear evidence based resolution to questions raised by human twinning The book is written for students and scholars of bioethics scientists theologians and attorneys who are involved in questions surrounding the human embryo **FMGE**
