The Routledge Handbook of Disability Arts, Culture, and Media Bree Hadley, Donna McDonald, 2018-12-07. In the last 30 years, a distinctive intersection between disability studies including disability rights advocacy, disability rights activism and disability law and disability arts, culture and media studies has developed. The two fields have worked in tandem to offer critique of representations of disability in dominant cultural systems, institutions, discourses and architecture and develop provocative new representations of what it means to be disabled. Divided into 5 sections: Disability Identity and Representation, Inclusion, Wellbeing and Whole of life Experience, Access, Artistry and Audiences, Practices, Politics and the Public Sphere, Activism, Adaptation and Alternative Futures, this handbook brings disability arts, disability culture and disability media studies traditionally treated separately in publications in the field together for the first time. It provides scholars, graduate students, upper level undergraduate students and others interested in the disability rights agenda with a broad based, practical and accessible introduction to key debates in the field of disability art, culture and media studies. An internationally recognised selection of authors from around the world come together to articulate the theories, issues, interests and practices that have come to define the field. Most critically, this book includes commentaries that forecast the pressing present and future concerns for the field as scholars, advocates, activists and artists work to make a more inclusive society a reality.

global South The book is divided into eight sections Setting the Scene Decolonising Disability Studies Postcolonial Theory Inclusive Development Postcolonial Disability Studies and Disability Activism Postcolonial Disability and Childhood Studies Postcolonial Disability Studies and Education Postcolonial Disability Studies Gender Race and Religion Conclusion And comprised of 27 newly written chapters this book leads with postcolonial perspectives closely followed by an engagement with critical disability studies with the explicit aim of foregrounding these contributions pulling them in from the edges of empirical and theoretical work where they often reside in mainstream academic literature The book will be of interest to all scholars and students of disability studies and postcolonial studies as well as those working in sociology literature and development studies

Embodied Inequalities in Disability and Development Hisayo Katsui, Virpi Mesiäislehto, 2022-04-08. This book highlights the embodied knowledge of persons with disabilities as a vital resource for understanding equality without taking disability and development for granted. The perspective of embodied inequality offers alternative ways to comprehend our normality as until now the notion of normality has too frequently excluded persons with disabilities and their perspectives. Disability inclusion has never been as important as it is today in the development discourse yet systematic discrimination against people due to their disabilities persists. To address this, the link between theories and practices is strengthened in this book. Through using different contexts in the different book chapters, the readers are informed of how profoundly inequalities are embedded in our society and pronounced as embodied experiences of persons with disabilities. The chapters are written not only by academics but also by disability activists and NGO representatives. The chapters focus on disabilities and development as embodied inequalities manifested at different levels including theory, law and policy, and practice. In conclusion, the book presents 6 As as lessons learned from decolonial understanding and conceptions of embodied inequalities in different contexts of disability and development: Availability, Affordability, Accessibility, Accountability, Assistance, and Affection.

Project(ing) Human: Representations of Disability in Science Fiction Courtney Stanton, 2023-05-30. This edited volume examines representations of disability within popular science fiction using examples from television, film, literature, and gaming to explore how the genre of science fiction shapes cultural understanding of disability experience. Science fiction texts typically grapple with concepts such as transhumanism, embodiment, and autonomy more directly than do those of other genres. In doing so, they raise significant questions about the experience of disability. More broadly, they often convey the place of disability in not only the future but also the world of today. Through critical research, the chapters within this interdisciplinary collection explore what science fiction texts convey about the value of disability, whether it be through disabled characters, biotechnologies, or more broadly, conceptions of an idealized future. Chapters are grouped thematically and include discussions of the intersections of disability with other identity groups, the interplay of disability and market/capitalist value, and how disability shapes current and future definitions of humanness, agency, and autonomy. This full volume builds on current research regarding the relationship of disability studies to the science fiction genre by exploring new themes and contemporary media to aid as an instructional tool for scholars in fields of disability studies, science fiction literature, and media studies.
