# INTIMATE RELATIONSHIPS

Rowland S. Miller

An impressionistic painting of a man and a woman in a field. The man is on the left, wearing a dark jacket and light trousers, looking towards the woman. The woman is on the right, wearing a dark dress with a red collar, looking back at him. They are surrounded by lush green grass and small red flowers. The background is a soft, hazy landscape with rolling hills and a small building in the distance. The overall style is painterly and romantic.

**Aversive Interpersonal Behaviors** Robin M. Kowalski, 2013-11-11 Aversive behaviors have greater influence on social interactions than is generally acknowledged determining personal satisfaction interpersonal attraction choice of partners and the course of relationships What motivates aversive behaviors To what extent do they obtain desired outcomes In what ways are they unnecessary and destructive How do other people respond emotionally and behaviorally These are just a few of the many interesting questions addressed by the 16 respected researchers who contribute to *Aversive Interpersonal Behaviors* Nine chapters give this heretofore neglected subject the attention it is due probing a dark side of interpersonal relationships to understand both its destructive

and adaptive nature      The Self-Conscious Emotions Jessica L. Tracy, Richard W. Robins, June Price Tangney, 2013-11-27  
Timely and authoritative this volume reviews the breadth of current knowledge on the self-conscious emotions and their role in psychological and social functioning. Leading investigators approach the subject from multiple levels of analysis ranging from basic brain mechanisms to complex social processes. Chapters present compelling advances in research on the most fundamental self-conscious emotions: embarrassment, guilt, humiliation, pride, and shame. Addressed are neural and evolutionary mechanisms, developmental processes, cultural differences and similarities, and influences on a wide array of social behaviors and personality processes. A unique chapter on assessment describes and evaluates the full range of available measures      *Handbook of Individual Differences in Social Behavior* Mark R. Leary, Rick H. Hoyle, 2013-12-17  
How do individual differences interact with situational factors to shape social behavior? Are people with certain traits more likely to form lasting marriages, experience test-taking anxiety, break the law, feel optimistic about the future? This handbook provides a comprehensive, authoritative examination of the full range of personality variables associated with interpersonal judgment, behavior, and emotion. The contributors are acknowledged experts who have conducted influential research on the constructs they address. Chapters discuss how each personality attribute is conceptualized and assessed, review the strengths and limitations of available measures, including child and adolescent measures when available, present important findings related to social behavior, and identify directions for future study      *Social Cognition and Communication* Joseph P. Forgas, Orsolya Vincze, János László, 2013-07-31  
Language is the essence of interpersonal behavior and social relationships, and it is social cognitive processes that determine how we produce and understand language. However, there has been surprisingly little interest in the past linking social cognition and communication. This book presents the latest cutting-edge research from a select group of leading international scholars investigating how language shapes our thinking and how social cognitive processes in turn influence language production and communication. The chapters represent diverse perspectives of investigating the links between language and communication, including evolutionary, linguistic, cognitive, and affective approaches, as well as the empirical analysis of written and spoken narratives. New methodologies are presented, including the latest techniques of text analysis, to illuminate the psychology of individual language users and entire cultures and societies. The chapters address such questions as: how are cognitive and identity processes reflected in language? How do affective states influence language production? Are politeness norms in language use effective? How do partners manage to accommodate to each other's communicative expectations? What is the role of language as a medium of interpersonal and intergroup influence? How are individual and cultural identities reflected in and shaped by narratives in literature, school texts, and the media? The book is aimed at all students, researchers, and laypersons interested in the interplay between thinking and communication and should be required reading for all professionals who use language in their everyday work to interact with people      *The Psychology of Social Conflict and Aggression* Joseph P. actual or imagined of others within a rule and norm governed milieu As such it bridges our personal individual and embodied experience with the social cultural and political world that contains us Luna Dolezal argues that understanding body shame can shed light on how the social is embodied that is how the body experienced in its phenomenological primacy by the subject becomes a social and cultural artifact shaped by external forces and demands The Body and Shame introduces leading twentieth century phenomenological and sociological accounts of embodied subjectivity through the work of Edmund Husserl Maurice Merleau Ponty Jean Paul Sartre Michel Foucault and Norbert Elias Dolezal examines the embodied social and political features of body shame contending that body shame is both a necessary and constitutive part of embodied subjectivity while simultaneously a potential site of oppression and marginalization Exploring the cultural politics of shame the final chapters of this work explore the phenomenology of self presentation and a feminist analysis of shame and gender with a critical focus on the practice of cosmetic surgery a site where the body is literally shaped by shame The Body and Shame will be of great interest to scholars and students in a wide variety of fields including philosophy phenomenology feminist theory women s studies social theory cultural studies psychology sociology and medical humanities **Adult**

**Children of Divorce** Geraldine K. Piorkowski, 2008-10-30 Romantic love is often an elusive fragile and tenuous state difficult to maintain across time The rates of divorce re divorce relationship violence and abuse today attest to the fact we are failing at romantic love And for teen aged and adult children of divorce romantic love can be especially elusive Because they have no roadmap for a satisfying stable romantic relationship derived from their own parents they are confused by what love is and tend to make poor partner choices Borrowing heavily from popular culture for unrealistic standards regarding love they become disillusioned when their all too ordinary lovers don t measure up Especially vulnerable to the problems their parents had they tend to overreact in a similar negative fashion and are all too ready to consider divorce when unhappiness strikes In attempting to halt intergenerational transmission of divorce Psychologist Piorkowski points to how we can recognize that American popular culture presents an overly sexualized explosive and superficial version of love that can t last With this book adult children of divorce can begin to see how they have been affected by familial experiences and develop a new realistic map to find more fulfilling and enduring romantic relationships Piorkowski in an extensive review of literature also looks at cultural factors and how they impact romantic love and marriage In contrast to American popular culture s shallow rendition of romantic love many cultures elsewhere in the world emphasize compatibility religion and family allegiance As a result says the author such marriages appear more stable than American unions built upon the shifting sands of emotion **Motivation and Its Regulation** Joseph P.
