Corporate Social Responsibility and Corporate Citizenship - Business concepts for the future!? Michael Baumgartner, 2002-03-07 Inhaltsangabe Abstract In recent years more and more people expressed their concerns about some companies performance Mainly not about their financial performance but about their social performance About their attitude towards the environment About the treatment of employees Consumers governments environmentalists trade unions but also managers felt that there is a need for change in business life The concepts of Corporate Social Responsibility CSR and Corporate Citizenship are seen as the way where business needs to go in the future The basic idea of the concepts is that companies are a vital part of the society and that they cannot ignore this any longer Business has both the power and the responsibility to behave in a way that satisfies not only shareholders but also employees customers the environment the community and the society as a whole In this paper I will give an overview of the new approach to business responsibility It is an incredibly huge topic related to many important issues It would have been possible to write hundreds of pages about subtopics like the employee employer relationship or environmental issues I chose a different approach and will give a panoramic view of this fascinating and complex topic Of course I had to focus on some of the most important issues but I

consider a holistic approach as very important as it shows the interrelation between business and its stakeholders After a general introduction to the topic in Chapter 1 I will define the different areas of Corporate Social Responsibility and give a short summary of the history of CSR Following this I will present the reasons why the topic of socially responsible companies becomes more and more important Chapter 4 will focus on an introduction of the main issues of CSR including Human Rights environmental issues corporate governance and many more In the main part of this paper Chapters 5 to 9 I will explore the issues of CSR which I consider most important I will present the hottest topics and how business responds to them This will not only be done theoretically but I will also give examples of companies who tried to go new ways Even though I think that the new approach called CSR is definitely a top business approach for the future I tried to question the approach and to find critical points which will be presented directly in the different chapters The concept of Corporate Social Responsibility as a whole is
