The Chemical News and

Journal of Physical Science ,1894 **Learning to Save the World** Betsey Behr Brada, 2023-02-15 Learning to Save the World provides an innovative analysis of how individuals inhabit refuse and reconfigure the contours of global health In 2001 Botswana's government faced with one of the highest HIV prevalence rates in the world committed itself to sub Saharan Africa's first free public HIV treatment program US based private foundations and medical schools offered support to demonstrate the feasibility of public HIV treatment in Africa Given US interest and investment in global health this support created opportunities for US physicians and medical trainees to interact with local practitioners treat patients and shape health policy in Botswana Although global health has emerged as a powerful call to planetary moral action the nature of this exhortation remains unclear Is global health a new movement for social justice or is it neocolonial creating new dependencies under the banner of humanitarianism Betsey Behr Brada shows that global health is a frontier an imaginative framework that organizes the space time and ethics of encounter Learning to Save the World reveals how individuals and collectivities engaged in global health visiting experts as well as local clinicians and patients come to regard themselves and others in terms of this framework 2024-25 Pharmacist Exam Planner Solved Papers YCT Expert Team, 2024 25 Pharmacist Exam Sharing Clinical Trial Data Institute of Medicine, Board on Health Sciences Policy, Committee on Planner Solved Papers Strategies for Responsible Sharing of Clinical Trial Data, 2015-04-20 Data sharing can accelerate new discoveries by avoiding duplicative trials stimulating new ideas for research and enabling the maximal scientific knowledge and benefits to be gained from the efforts of clinical trial participants and investigators At the same time sharing clinical trial data presents risks burdens and challenges These include the need to protect the privacy and honor the consent of clinical trial participants safeguard the legitimate economic interests of sponsors and guard against invalid secondary analyses which could undermine trust in clinical trials or otherwise harm public health Sharing Clinical Trial Data presents activities and strategies for the responsible sharing of clinical trial data With the goal of increasing scientific knowledge to lead to better therapies for patients this book identifies guiding principles and makes recommendations to maximize the benefits and minimize risks This report offers guidance on the types of clinical trial data available at different points in the process the points in the process at which each type of data should be shared methods for sharing data what groups should have access to data and future knowledge and infrastructure needs Responsible sharing of clinical trial data will allow other investigators to replicate published findings and carry out additional analyses strengthen the evidence base for regulatory and clinical decisions and increase the scientific knowledge gained from investments by the funders of clinical trials The recommendations of Sharing Clinical Trial Data will be useful both now and well into the future as improved sharing of data leads to a stronger evidence base for treatment This book will be of interest to stakeholders across the spectrum of research from funders to researchers to journals to physicians and ultimately to patients Simulating Social Complexity Bruce Edmonds, Ruth Meyer, 2017-11-24 This volume examines all aspects of using agent or individual based simulation. This approach represents systems as

individual elements having their own set of differing states and internal processes. The interactions between elements in the simulation represent interactions in the target systems What makes this social is that it can represent an observed society Social systems include all those systems where the components have individual agency but also interact with each other This includes human societies and groups but also increasingly socio technical systems where the internet based devices form the substrate for interaction These systems are central to our lives but are among the most complex known This poses particular problems for those who wish to understand them The complexity often makes analytic approaches infeasible but on the other hand natural language approaches are also inadequate for relating intricate cause and effect This is why individual and agent based computational approaches hold out the possibility of new and deeper understanding of such systems This handbook marks the maturation of this new field It brings together summaries of the best thinking and practices in this area from leading researchers in the field and constitutes a reference point for standards against which future methodological advances can be judged This second edition adds new chapters on different modelling purposes and applying software engineering methods to simulation development Revised existing content will keep the book up to date with recent developments This volume will help those new to the field avoid reinventing the wheel each time and give them a solid and wide grounding in the essential issues It will also help those already in the field by providing accessible overviews of current thought The material is divided into four sections Introduction Methodology Mechanisms and Applications Each chapter starts with a very brief section called Why read this chapter followed by an abstract which summarizes the content of the chapter Each chapter also ends with a section on Further Reading Whilst sometimes covering technical aspects this second edition of Simulating Social Complexity is designed to be accessible to a wide range of researchers including both those from the social sciences as well as those with a more formal background It will be of use as a standard reference text in the field and also be suitable for GENERAL SCIENCE SOLVED PAPERS YCT EXPERT TEAM, 2020 RRB GENERAL SCIENCE graduate level courses **SOLVED PAPERS** Physical Modelling in Geotechnics, Volume 1 Andrew McNamara, Sam Divall, Richard Goodey, Neil Taylor, Sarah Stallebrass, Jignasha Panchal, 2018-07-11 Physical Modelling in Geotechnics collects more than 1500 pages of peer reviewed papers written by researchers from over 30 countries and presented at the 9th International Conference on Physical Modelling in Geotechnics 2018 City University of London UK 17 20 July 2018 The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions The books represent a substantial body of work in four years Physical Modelling in Geotechnics contains 230 papers including eight keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and geohazards including significant contributions in the area of seismic engineering ISSMGE TC104 have identified areas for special attention including education in physical

modelling and the promotion of physical modelling to industry With this in mind there is a special themed paper on education focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called megafuges of 1000gtonne capacity or more capable of modelling the largest and most complex of geotechnical challenges Physical Modelling in Geotechnics will be of interest to professionals engineers and academics interested or involved in geotechnics geotechnical engineering and related areas The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering ISSMGE City University of London are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference Eurofuge ten years ago in 2008 Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers in particular the opportunity to attend an international conference in this rapidly evolving specialist Human Movement and Motor Control in the Natural Environment Peter A area This is volume 1 of a 2 volume set Federolf, Maurice Mohr, Thorsten Stein, Gert-Jan Pepping, Steven van Andel, Gillian Weir, 2023-06-08 The basic understanding of human movement and control of human movement stems largely from laboratory measurements where human movement can be quantified with high precision and accuracy but where the artificial environment compromises ecological validity A good example for this issue was demonstrated in a recent investigation specifically that the walking gait pattern of healthy individuals in a laboratory changed as a function of how many researchers were present during the experiment Observations like these underscore that study volunteers adapt their behavior to the specific laboratory environment and warrant the question of how well we can transfer our lab based understanding of gait patterns and the underlying neuromuscular control system to walking during daily living Another research area where lab based movement assessments have led to conflicting findings is the field of sports injury prevention Many neuromuscular training programs have been shown to be effective in reducing the sport injury rate in athletes by 30 50% or more in a variety of different multi directional sports Nevertheless lab based assessments of the same athletes who completed those training programs were often not able to detect improvements in motor control of sport specific movements or a reduction in joint loading two factors thought to be closely linked with sport injury risk This disconnect suggests that lab based assessments of movement and motor control are often poor indicators of player behavior during real game scenarios and may limit our ability to screen athletes for injury risk or monitor their progress in rehabilitation These examples highlight that we should strive for the assessment and investigation of human movement and motor control in natural environments i e where individuals patients athletes or other groups of interest perform explore and interact under real world conditions The Adulteration of Children's Sports Kristi

Erdal, 2020-07-20 The Adulteration of Children's Sports explores current behavioral and physiological research about how children's organized sport has changed how adults goals and needs are at the heart of those changes and the consequences of those changes on children's enjoyment of sport and on their autonomy creativity and moral reasoning outside of sport Adult introduction of early competition extrinsic rewards early sport specialization and year round participation has thwarted children's intrinsic motivation and contributed to children's attrition from sport Kristi Erdal explores concerns about the future of sport itself as adult mediated selection practices whittle down young athletes earlier on shakier criteria Parents and coaches complicity in these practices however is based on intermediaries poorly interpreting or ignoring the research literature Thus the final chapters of this book are about translating the research into applied ideas for change Erdal provides an essential introduction to evidence based research about children's health and well being in sport and debunks myths along the way Adults built the problems compiled in this text We can dismantle them as well **Advances in Sports** Science and Technology D. Prasanna Balaji, Pinar Dinc Kalayci, Seshadri S. Ramkumar, 2025-04-29 It focused on the strategies challenges and choices in the renaissance of modern sports It brought together scientists sports persons decision makers and executives from across the globe to share research approaches methods and results It analyzed ways for implementing adaptable and observable improvement which have direct impact on sports The Sage Handbook of Health Psychology Katherine Brown, Cecilia Cheng, Martin Hagger, Kyra Hamilton, Stephen R Sutton, 2025-06-28 The Sage Handbook of Health Psychology 2e Volume Two Applications of Health Psychology covers the practical applications of health psychology addressing intervention development health improvement strategies mental health and wellbeing health protection and the integration of health psychology into policy and professional practice With contributions from leading experts this is an indispensable resource for those looking to apply health psychology principles to real world challenges This Handbooks is a must read for postgraduate students researchers and practitioners aiming to improve health and wellbeing outcomes through evidence based practices Section One Issues and Debates in Health Psychology Section Two Intervention Development Approaches Section Three Health Improvement Interventions and Preventive Behaviors Section Four Improving Mental Health and Wellbeing Section Five Health Protection Interventions and Long term Conditions Section Six Health Sedentary Behavior and Health Zhu, Weimo, Owen, Neville, 2017-01-19 With research from Psychology in Practice leading scientists Sedentary Behavior and Health Concepts Assessments and Intervention presents evidence on sedentary behavior its apparent health risks and suggestions on measuring and altering this behavior Brief Interventions for Risky Drinkers Antoni Gual, Peter Anderson, Hugo López-Pelayo, Jillian Reynolds, 2016-06-29 Alcohol is the sixth leading risk factor for disability and premature death all over the world and one of the leading causes of premature mortality in western societies it is a leading risk factor for death in young and middle age males Heavy drinking accounts for about two thirds of the burden of disease attributable to alcohol In the early 1980s screening and brief interventions SBI in primary health care

settings were proposed as effective strategies to identify risky drinkers and to help them reduce their drinking Since then a growing body of evidence including several meta analysis and Cochrane reviews has shown the efficacy and effectiveness of SBI in primary health settings However demonstrating the effectiveness of SBI has not been insufficient to facilitate its general implementation in the routines of primary health care physicians and in fact the dissemination of SBI has proven to be a difficult business Qualitative and quantitative research has identified most of the facilitators and barriers for its implementation and publicly funded research has been earmarked to address the dissemination problems worldwide Some examples are the World Health Organization Phase III and Phase IV studies on the identification and management of alcohol related problems in primary care EU funded projects PHEPA AMPHORA ODHIN BISTAIRS the UK SIPS trials and the SBIRT developments sponsored by the Substance Abuse what length should they be is there a need for booster sessions is there added value of a motivational approach These questions together with other relevant aspects of SBI need ongoing research In recent years SBIs have been tested in settings other than primary health care including hospitals accident and emergency rooms criminal justice colleges and universities social services and pharmacies In some of those areas the evidence is scarce for example pharmacies while in others it is very promising for example students and hospitals New technologies have also offered the possibility of online tools and in the last few years different digital based applications have been tested successfully as new ways to deliver effective SBIs to larger amounts of people Brief interventions have also spread to drugs other than alcohol This book aims to be an update of the state of the art of brief advice It is a compilation of articles published by some of the most relevant researchers in the field in Frontiers in Psychiatry between 2014 and 2016 The Trials of Evidence-based Education Stephen Gorard, Beng Huat See, Nadia Siddiqui, 2017-06-26 The Trials of Evidence based Education explores the promise limitations and achievements of evidence based policy and practice as the attention of funders moves from a sole focus on attainment outcomes to political concern about character building and wider educational impacts Providing a detailed look at the pros cons and areas for improvement in evidence based policy and practice this book includes consideration of the following What is involved in a robust evaluation for education The issues in conducting trials and how to assess the trustworthiness of research findings New methods for the design conduct analysis and use of evidence from trials and examining their implications What policy makers head teachers and practitioners can learn from the evidence to inform practice In this well structured and thoughtful text the results and implications of over 20 studies conducted by the authors are combined with a much larger number of studies from their systematic reviews and the implications are spelled out for the research community policy makers schools wanting to run their own evaluations and for practitioners using evidence Panoramic View of Cognitive Impairment: Interdisciplinary Cognitive Research Fangyi Xu, 2024-08-01 Cognition information processing activities for individuals to understand the objective world reflects the real world in the human brain Cognitive impairment refers to a decline in cognitive functioning of varying degrees from subjective cognitive impairment to

severe dementia With the accelerated global population aging the number of people with cognitive impairment is increasing rapidly Dementia has become a major contributor to the global burden of disease and loss of disability adjusted life years Cognitive impairment is a heterogeneous syndrome the cause of which is still myriad Although significant advancement in the understanding of the pathology of cognitive impairment has been made in recent decades the tools and strategies at our disposal to deal with cognitive impairment are still very limited Currently no disease modified treatment has been identified Interdisciplinary research refers to the methodology of comprehensive understanding or problem solving through the intersection between natural science and social science and other disciplines or the internal intersection between many disciplines within a certain category of science It is conducive to the overall understanding of problems and identifying effective solutions to complex problems faced by human society In recent years studies in many fields other than neurology have inspired our understanding of cognitive impairment putting forward new insights into its phenomenology and providing many effective prevention or alleviation strategies to delay cognitive decline or manage the symptoms It is very likely that interdisciplinary research would shed a light on our efforts to cope with the challenges brought by the growing epidemic of cognitive impairment Mechanisms underlying firing in healthy and sick human motoneurons Parveen N.S. Bawa, Maria Piotrkiewicz, Annie Schmied, 2015-07-08 Since the latter half of the twentieth century an enormous amount of knowledge about mammalian motoneuron pools has been collected. This progress was enabled mostly by the development of the precise techniques of intracellular recordings in acute animal experiments many of which were conducted under deep anaesthesia Recently obtained evidence indicates that anaesthetics used at that times changed certain properties of the cell membrane which might affect firing of the neuron Experiments on normal humans gets around this problem which lets one compare MN firing characteristics in humans and reduced preparations Firing pattern of human motoneurons is obtained indirectly by recording from a few muscle fibres of a motor unit Since there is one to one relationship between motor unit and motoneuron firing the statistical analysis of motor unit firing is equivalent to the analysis of motoneuron firing This analysis based on the essential knowledge about motoneuron physiology gained from the direct measurements in animal experiments and verified by computer simulations allows one to draw conclusions about the physiological properties of human motoneurons For obvious reasons the deductions made on properties of human motoneuron from these analyses should be accepted with caution On the other hand human experiments provide the unique opportunity to study intact motoneurons during normal physiological behavior Thus combining information obtained from animal and human experiments and computer simulations gives insight into underexplored problems of motor control This E book contains a collection of articles with range of exciting findings on the physiology and pathology of human motoneurons The collection covers such important issues concerning firing of healthy motoneurons as recruitment and rate coding as well as motoneuron excitability discusses intrinsic motoneuron properties disclosed by studying double discharges and provides information on

broad spectrum of motoneuron pathology It is our hope that this collection promotes further expansion of knowledge on human motoneurons Essentials of Youth Fitness Avery D. Faigenbaum, Rhodri S. Lloyd, Jon L. Oliver, American College of Sports Medicine, 2020 ACSM s Essentials of Youth Fitness is the authoritative guide on motor skill development aerobic and anaerobic conditioning and strength power speed and agility training for young athletes Farmsteads and Funerary Sites: The M1 Junction 12 Improvements and the A5-M1 Link Road, Central Bedfordshire Jim Brown, 2020-01-31 Extensive excavations by MOLA Museum of London Archaeology near Houghton Regis and Toddington in south Central Bedfordshire provide a detailed multi period dataset for regional and national comparison Evidence ranges from middle late Bronze Age pits to medieval settlements
