

(C) The total frequency is equal to the sum of the frequencies for the two cities.

(D) The total relative frequency is the total frequency divided by the sum of all total frequencies. The relative frequency for each city is the frequency for that city divided by the sum of the frequencies for that city. Since the sum of the frequencies for each city is not the same as the sum of the total frequencies, the total relative frequency is not the sum of the relative frequencies for the two cities.

36. (A) No. The proportions are not parts of a whole. In particular, they do not add up to 1.
