

Emily Boltran
Period 3
Fall of Rome DBQ

The Roman Empire, a once flourishing and powerful society, which reigned from the years 395 AD to 476 AD, would soon collapse. For several years the empire was bombarded with several issues which would ultimately lead to its downfall. After many years of corruption, struggle, and destruction Rome took its final blow in 476 AD. The German leader Odoacer staged a revolt, Romulus Augustus, the final Roman emperor, was forced to renounce his efforts and Odoacer took control of Italy. This was the final component of a lengthy chain reaction. The fall of the Western Roman Empire was brought up as a result of a plethora of factors. However, the political issues which took place within the empire were a direct cause of the empire's fall. The empire was brought down from the inside, as the political factors which it faced led to an internal chaos, lack of organization and divided empire.

With its vast territory, influential trade routes and endless impacts on the world the Roman Empire compared to no other. However, one of the empire's breaking points would be the lack of organization which would eat away at the empire. The Roman Empire expanded so greatly it is known today as one of the largest empires in the ancient world, inhabiting 50 to 90 million people. To govern over such a significantly large region and population, great organization is needed to keep society in order. This was one of the major factors that the empire lacked, more organization would be one of the factors which contributed to its fall. The people were pushed away from political matters and their every move was in the hands of corrupt leaders who were not aware or chose to disregard the chaos they were spreading across the empire. The empire could not organize, it could not support a military, it was unable to have a stable economy. (Document 1) The author's purpose in writing this document is to show the effects of the disorganization in the empire. This disorganization arose from the political conflicts which were taking place within the empire. As those in power attempted to grow themselves wealthier the people did not have the means to survive. Chaos reigned throughout the empire, for the power of the few. Ultimately the fall of Rome was inevitable due to its size. (Document 2) Its size alone was a factor to consider when determining the causes of the fall of the empire. However, the main issue was the fact that this vast territory could not be effectively governed. The leaders could not organize the many people, the many micro economies, the trade routes, and a great deal of other matters. The methods of dividing power were typically careless and ineffective. For such an empire to survive organization had to be a top priority yet this need was pushed to the side. This lack of organization could have easily been avoided with the proper political actions and governance. Despite this those who had power over the common people had their own interests as the main priority. The Western Roman Empire would fall as a result of the internal issues caused by the lack of a strong political system.

Although it is argued that religion was one of the major factors which led to the fall of the Roman empire, the true root of the issue between religion and the empire arose from the instability of political ideas and the lack of unity throughout the empire. Based on the information provided in Document 4 it can be established that, the government eliminated individualistic ideas and took responsibility over all affairs. The people left with no voice, no valid opinion, were in a place of weakness. They were no longer the once self-reliant and initiative people. The author's purpose in writing this document was to demonstrate how the people of the Roman empire were impacted by the political influence of the government.
