The United States of War David Vine, 2021-09-07 2020 L A Times Book Prize Finalist History A provocative examination of how the U S military has shaped our entire world from today s costly endless wars to the prominence of violence in everyday American life The United States has been fighting wars constantly since invading Afghanistan in 2001 This nonstop warfare is far less exceptional than it might seem the United States has been at war or has invaded other countries almost every year since independence In *The United States of War* David Vine traces this pattern of bloody conflict from Columbus s 1494 arrival in Guantanamo Bay through the 250 year expansion of a global U S empire Drawing on historical and firsthand anthropological research in fourteen countries and territories *The United States of War* demonstrates how U S leaders across generations have locked the United States in a self perpetuating system of permanent war by constructing the world s largest ever collection of foreign military bases a global matrix that has made offensive interventionist wars more likely Beyond exposing the profit making desires political interests racism and toxic masculinity underlying the country s relationship to war and empire *The United States of War* shows how the long history of U S military expansion shapes our daily lives from today s multi trillion dollar wars to the pervasiveness of violence and militarism in everyday U S life The book concludes by confronting the catastrophic toll of American wars which have left millions dead wounded and displaced while offering proposals for how we can end the fighting

Resolving Structural Conflicts Richard E. Rubenstein, 2017-01-06 This book analyses how certain types of social systems generate violent conflict and discusses how these systems can be transformed in order to create the conditions for positive peace *Resolving Structural Conflicts* addresses a key issue in the field of conflict studies what to do about violent conflicts that are not the results of misunderstanding prejudice or malice but the products of a social system that generates violent conflict as part of its normal operations This question poses enormous challenges to those interested in conflict resolution since the solution to this problem involves restructuring social political and cultural systems rather than just calling in a mediator to help people arrive at an agreement This study breaks new ground in showing how local conflicts involving crime police and prisons transnational conflicts involving religious terrorism by groups

like ISIS and international conflicts involving Great Power clashes are all produced in large part by elite driven exploitative or oppressive social structures It also presents new ideas about the implications of this structural turn for the practice of conflict resolution emphasizing the need for conflict resolvers to embrace a new politics and to broaden their methods far beyond traditional forms of facilitation Written by a leading scholar this book will be of much interest to students of conflict resolution peace studies war and conflict studies sociology political science and international relations in general

Genocide, Ethnonationalism, and the United Nations Hannibal Travis, 2013 *Genocide Ethnonationalism and the United Nations* examines a series of related crises in human civilization growing out of conflicts between powerful states or empires and indigenous or stateless peoples This is the first book to attempt to explore the causes of genocide and other mass killing by a detailed exploration of UN archives covering the period spanning from 1945 through 2011 Hannibal Travis argues that large states and empires disproportionately committed or facilitated genocide and other mass killings between 1945 and 2011 His research incorporates data concerning factors linked to the scale of mass killing and recent findings in human rights political science and legal theory Turning to potential solutions he argues that the concept of genocide imagines a future system of global governance under which the nation state itself is made subject to law The United Nations however has deflected the possibility of such a cosmopolitical law It selectively condemns genocide and has established an institutional structure that denies most peoples subjected to genocide of a realistic possibility of global justice lacks a robust international criminal tribunal or UN army and even encourages security cooperation among states that have proven to be destructive of peoples in the past Questions raised include What have been the causes of mass killing during the period since the United Nations Charter entered into force in 1945 How does mass killing spread across international borders and what is the role of resource wealth the arms trade and external interference in this process Have the United Nations or the International Criminal Court faced up to the problem of genocide and other forms of mass killing as is their mandate

An Indigenous Peoples History of the United States is an essential resource providing historical threads that are crucial for understanding the present In An Indigenous Peoples History of the United States Dunbar Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants displacing or eliminating them And as Dunbar Ortiz reveals this policy was praised in popular culture through writers like James Fenimore Cooper and Walt Whitman and in the highest offices of government and the military Shockingly as the genocidal policy reached its zenith under President Andrew Jackson its ruthlessness was best articulated by US Army general Thomas S Jesup who in 1836 wrote of the Seminoles The country can be rid of them only by exterminating them Spanning more than four hundred years this classic bottom up peoples history radically reframes US history and explodes the silences that have haunted our national narrative An Indigenous Peoples History of the United States is a 2015 PEN Oakland Josephine Miles Award for Excellence in Literature *A History of the United States for the Grammar Grades* Robert Green Hall, Harriet Smither, Clarence Ousley, 1920 *Founding Myths* Ray Raphael, 2014-07-04 The tenth anniversary edition of the book that showed why we must move past historical nonsense so that a truer more democratic national record can emerge School Library Journal Originally published to universal acclaim award winning historian Ray Raphael s *Founding Myths* has since established itself as a landmark of historical myth busting With Raphael s trademark wit and flair *Founding Myths* exposed the errors and inventions in America s most cherished tales from Paul Revere s famous ride to Patrick Henry s Liberty or Death speech For the thousands who have been captivated by Raphael s eye opening accounts history has never been the same In this revised tenth anniversary edition Raphael revisits the original myths and further explores their evolution over time uncovering new stories and peeling back new layers of misinformation This new edition also examines the highly politicized debates over America s past as well as how our approach to history in school reinforces rather than corrects historical mistakes A book that explores the truth behind the stories of the making of our nation National Public Radio this revised edition of *Founding Myths* will be a welcome resource for anyone seeking to separate historical fact from fiction **We the People** ,1984 **History Museums in the United States** Warren Leon, Roy Rosenzweig, 1989 Every year 100 million visitor s tour historic houses and re created villages examine museum artifacts and walk through battlefields But what do they learn What version of the past are history museums offering to the public And how well do these institutions reflect the latest historical scholarship Fifteen scholars and museum staff members here provide the first critical assessment of American history museums a vital arena for shaping popular historical consciousness They consider the form and content of exhibits ranging from Gettysburg to Disney World They also examine the social and political contexts on which museums operate *History of the American People* Willis Mason West, 1918 *Research in Education* ,1971 **How Uk Should Be** James Nicholls, 2020-12-10 This is a book which

holds a very large amount of my ideological beliefs which form a new ideology quite unlike any other before it I dream of a better world a healthier world A world where people are safe and all products which poison the minds and lead to human destruction don t exist A world where animal species are never driven to extinction and co exist with people rather well where many natural areas of the world remain untouched unpolluted and humans are safe from the natural hazards of the world and the unnatural hazards of the world An economic system which is fair and relatively stable and where jobs are as easy to get as merely talking A world where every religion is at peace with the other as are its followers to followers of another A justice system which is real justice and countries whom many people can say their honestly proud of being a citizen of A world free of economic corruption and instability Grasslands as green as the deepest green and forests which have trees not seldom seen A world where everyone can claim free speech no matter how outrageous radical stupid or barbaric it may sound to those people with differing views The name of this new ideological belief should be officially called Distributionism This book mainly focuses on the United Kingdom and what s best for the United Kingdom but it can be read comfortably by people who aren t UK citizens
