Informationsintegration in mehrsprachigen Textchats Felix Hoberg, 2022-02-08 Die vorliegende Arbeit widmet sich der Informationsintegration in maschinell bersetzen mehrsprachigen Textchats am Beispiel des Skype Translators im Sprachenpaar Katalanisch Deutsch Der Untersuchung von Textchats dieser Konfiguration wurde sich bislang nur wenig zugewendet Deshalb wird der zun chst grundlegend explorativ ausgerichteten Forschungsfrage nachgegangen wie Personen eine maschinell bersetzte Textchat Kommunikation wahrnehmen wenn sie nicht der Sprache des Gegen bers m chtig sind Damit einher geht auch die Untersuchung der Informationsextraktion und verarbeitung zwischen Nachrichten die in der eigenen Sprache verfasst wurden und der Ausgabe der Maschinellen bersetzung Zur Erfassung des Nutzungsverhalten im Umgang mit Skype und dem Skype Translator wurde mit einer deutschlandweit an Studierende gesendeten Online Umfrage gearbeitet In einer zweiteiligen naturalistisch orientierten Pilotstudie unter Einsatz des Eye Trackers wurde das Kommunikationsverhalten von Studierenden mit deutscher Muttersprache einerseits in maschinell vom Skype Translator bersetzen Chats mit katalanischen Muttersprachler innen und andererseits als Referenz in monolingualen rein deutschsprachigen Chats ohne Skype Translator untersucht Bei den Teilnehmer innen an diesen Studien handelt es sich um zwei unabh ngige Gruppen Beide wurden ebenfalls mit Frageb gen

zum Nutzungsverhalten und zu den Eindrücken des Skype Translators erfasst. Das sicher überraschendste Ergebnis der Studie ist, dass die Versuchspersonen einen substantiellen Teil der Chatkommunikation auf der M-Ausgabe in beiden beteiligten Sprachen verbringen. Die Untersuchung der Sakkaden und Regressionen deutet auf einen sprunghaften Wechsel zwischen Originalnachricht und M hin. Der Schwerpunkt der Aufmerksamkeit liegt dabei konsequent auf den neusten Nachrichten. Es ist daher anzunehmen, dass die Versuchspersonen die M-Ausgabe aktiv in die Kommunikation miteinbeziehen und wesentliche Informationen zwischen Original und M abzugleichen versuchen.

Humans in Outer Space - Interdisciplinary

Odysseys Luca Codignola-Bo,Kai-Uwe Schrogli,2009-06-18 Humans and space When faced with the issue of space exploration one generally has an idea of the elds of study and disciplines that are involved technology physics and chemistry robotics astronomy and planetary science space biology and medicine disciplines which are usually referred to as the sciences In

recent discussions the human element of space exploration has attracted more and more the interest of the space sciences As a consequence adjacent disciplines have gained in relevance in space exploration and space research in times when human space lights are almost part of everyday life These disciplines include psychology and sociology but also history philosophy anthropology cultural studies political sciences and law The contribution of knowledge in these fields plays an important role in achieving the next generation of space exploration where humans will resume exploring the Moon and eventually Mars and wherespacetourism isbeginningtobedeveloped With regard to technology one might soon be prepared for this Much less is this the case with space exploration by humans rather than by robots Robotic explorations to other planets across the solar system have developed in the past 50 years since the beginning of the space age with the presence of humans in nearby space and the landing on the Moon Space exploration is now not only focused on technological achievements

The TUDAPOL Principle Arno Ritter,2020-05-11 Only about 10 30 percent of the planned strategies are ultimately realized However the recipes for success often seem quite simple If this is the case the question inevitably arises as to why our success rate is often so low Moreover the average lifespan of an organization is shorter than a human life What can organizations do to perform better and how can we ensure our survival and develop the ability to transform and adapt especially in the age of digitalization and Industry 4 0 However top management spends less than three percent of their time shaping the long term future Even if this figure is questionable it is an indicator that there is enormous potential to create our future much better It is our challenge as managers or entrepreneurs intrapreneurs to think without limits and to prepare

and shape the future Any straitjacket in thinking especially in innovation must be eliminated It is time to familiarize you with the concept of the Strategic Control Loop and the TUDAPOL principle unlimited thinking agile development lean production and operation This principle should enable you to meet the management challenges in the age of globalization increasing complexity and digital transformation
