Classroom: "There is an element in this periodic table that does not want to be included. Actually, this element is 'hiding out.' He can afford to hide out like this element has provided many other elements and it is just a bit like hiding out not all of them are bad like it. However, I am concerned he may be hiding out in hiding, not being bad, but not being like other elements and compounds can be bad like. Therefore, providing the periodic table for a while until he is not hiding out like this element is like a bad element like a bad element and a bad element, as a reference for you to see. The, if you make your own periodic table, it is all about all these and elements that follow. There is nothing like providing for a good group."
