Abstract

13. Many life insurance policies do not require an interest-free loan to be repaid with interest. These types of insurance policies are not an improvement on the cash-value life insurance. First cash-value insurance policies usually do not have an interest-free loan to the cash value account and some other provisions are slight variations.
14. Cash-value policies are considered as the permanent policies. These policies are also known as savings policies. These policies are only used for a specific time and then they have to be repaid and you should have a policy loaned to it.
15. These benefits of having government-owned policies is that you should stop paying for the interest and you should improve.
16. The amount of the policy increases as the amount you have invested in the policy increases. However, if you have an insurance policy for \$100,000 and you have a period of time you have invested \$10,000 in that policy, the insurance company, at the end of that month will only be paying \$10,000 of the policy because \$10,000 is your money.
