English as a Medium of Instruction in Higher Education Wenli Tsou, Shin-Mei Kao, 2017-06-13 This book presents the multiple facets of English as a Medium of Instruction (EMI) in higher education across various academic disciplines, an area that is expected to grow constantly in response to the competitive global higher education market. The studies presented were conducted in various EMI classrooms with data collected from observing and documenting the teaching activities and from interviewing or surveying EMI participants. Through data analysis and synthesis, cases across disciplines from engineering, science, technology, business, social science, medical science, design, and arts to tourism and leisure service sectors are used to illustrate the various EMI curriculum designs and classroom practices. Although the cases described are limited to Taiwanese institutions, the book bridges the gap between planning and executing EMI programs across academic domains for policy makers, administrators, content teachers, and teacher trainers throughout Asia.
