HOW TO PUT GUN TOGETHER — Your gun comes to you taken down. To put together is a simple operation. Here is all you need to do:

Inspection. Do not pump action or pull trigger with barrel removed.
Remove rust preventive coating from all metal parts, including bore of barrel, with a soft cloth. Unscrew magazine cap, remove carbide coating ring, press action bar lock of gun in cocked, move fore-and-aft way back. Put barrel extension into front end of receiver, magazine ring guide over magazine cap. Insert magazine cap. Make sure magazine cap is tight. Do not jam barrel against receiver when assembling barrel to receiver.
Caution. Before firing make sure barrel bore is clean and free of any grease, heavy oil or obstruction.
SAFETY (Fig. 1) — Before loading or unloading your gun, push safety across rear of trigger to ON SAFE position. Red band on safety will not show.

TO LOAD BARREL FROM MAGAZINE — Shells can be fed from loaded magazine by simply pumping fore-and-aft. Press in action bar lock (Fig. 1) if gun is cocked. Then pump fore-and-aft and forth to open and close action.
TO UNLOAD GUN — Push safety ON SAFE. Press in action bar lock, pull fore-and-aft slowly rearward until front end of shell from barrel is even with ejection port in receiver. Then lift front of shell upward and remove from ejection port. Continue pulling fore-and-aft fully until next shell releases from magazine. Fall gun sideways to allow released shell to drop from ejection port. Then close action by pushing forward on fore-and-aft. Continue this same method until magazine and gun are empty.

TO UNLOAD BARREL ONLY — Push safety ON SAFE. Press in action bar lock, pull fore-and-aft rearward until front end of shell from barrel is even with front end of ejection port. Then lift front end of shell from receiver as described above.

CAUTION: Open action and check shell chamber in breach of barrel and magazine to make sure no rounds remain in gun.
STANDARD MODEL (12-16-20 GA.) — Barrel is chambered for 2 1/2 inch shells in light or heavy modern Remington load or 2 1/2 inch magnum. Gun capacity of five shells includes 4 in magazine. Shot gun is equipped with wood magazine plug for reducing magazine capacity to 2 shells. To increase gun capacity to 5 shells, remove plug as follows: Remove magazine cap. Remove magazine spring retainer from front of magazine tube by pulling screw driver under inside rim of retainer and prying free. Remove carefully. Retainer is under compression of spring. Remove wood plug. Reassemble spring and retainer into tube. **IMPORTANT** — Place retainer into magazine tube, up toward, and not closely until flat on retainer is flush with end of tube.

3 INCH MAGNUM MODEL — Barrel is chambered for 3 inch Magnum shell. Magnum model will also shoot standard length 2 1/2 inch shell.

"VARIABLE WEIGHT" MAGAZINE PLUG (Steel) — Can be assembled to Magnum model or 12 Gauge Standard model. "Variable Weight" plug will limit magazine capacity to 2 shells and shells to 10 in. To increase capacity, remove plug and insert plug with small retaining screw at front end. Remove this screw before assembling steel plug into front of magazine tube. When assembling plug, remove magazine cap and barrel. Remove magazine spring retainer from front of open magazine tube. Use wood plug retainer. Insert plug into magazine tube. Insert magazine spring and push steel plug into front of tube. Align retaining screw hole in magazine tube (at front) with screw hole in assembled steel plug. Insert screw, tighten to steel plug.

NOTE: Magazine spring retainer is not replaced if steel plug is used. Replace barrel and magazine cap.
HANDLING — The outside of your gun should be wiped with oil to prevent rust. Invisible "grime" of moisture can cause rusting unless removed. Exposure to unfavorable weather or moisture from condensation also require additional care.

BELOW FREEZING WEATHER — Special attention should be taken that oil is removed from action parts, if a lubricant is desired — use dry graphite or similar non-conducting lubricant. Take care also to prevent rusting from condensation and wetness (cold weather to warm room, temperature on action parts and barrel bore, barrel chamber).

MAINTENANCE — Gun should be checked periodically by a competent gunsmith to ensure proper inspection and any necessary replacement of worn or damaged parts.
