Tale of Seven Elements Eric R. Scerri, 2025 In 1913 English physicist Henry Moseley transformed our understanding of the elements by organizing them by atomic number from hydrogen to uranium However it soon became obvious that researchers had yet to discover seven completely unknown elements In this updated and extended edition of his acclaimed book Eric Scerri presents the intriguing stories of these elements protactinium hafnium rhenium technetium francium astatine and promethium It follows their discoveries through the two world wars starting with protactinium in 1917 and ending with promethium in 1945 Scerri details the research leading to each discovery the pivotal experiments the chemists involved the properties of each element and their applications For example hafnium alloys named after Copenhagen hafnia have some of the highest boiling points and are used in rocket thrusters like those on the Apollo Lunar Modules Scerri then examines the integration of twenty five new elements into the periodic table over the past fifty years and concludes with a new chapter on rare Earth elements and the histories of their discoveries The Second Edition of A Tale of Seven Elements vividly portrays the journey of chemical research from missteps and disputes to the thrill of discovery illuminating the researchers behind the elements as much as their breakthroughs Provided by publisher *The Elements*, CliffsNotes Chemistry Practice Pack

answers correspond to the correct questions Marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand You don't have to answer every question You are not penalized if you do not answer every question The only penalty results from answering a question incorrectly Try to use the guessing strategy but if you are truly stumped by a question remember that you do not have to answer it Work quickly and steadily You have a limited amount of time to work on each section so you need to work quickly and steadily Avoid focusing on one problem for too long Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test On the night before the test gather together the materials you will need the next day Your admission ticket Two forms of identification e.g. driver's license student identification card or current alien registration card Two No. 2 pencils with erasers Directions to the test center A watch if you wish but not one that makes noise as it may disturb other test takers On the day of the test you should wake up early after a good night's rest and have breakfast Dress comfortably so that you are not distracted by being too hot or too cold while taking the test Also plan to arrive at the test center early This will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Chemistry Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information
