The Philosophy of Person-Centred Healthcare Derek Mitchell,Michael Loughlin,2022-11-22 This book sets out a philosophical basis for person centred healthcare primarily using work by Heidegger and Gadamer but drawing on ideas derived from Aristotle and process philosophy in order to show how practice can be improved and how examples of person centred practice can be transferred between individuals and institutions involved in the commissioning and provision of healthcare By providing an underlying architectonic this work will help to enable practitioners to understand the benefits of person centred healthcare practice in promoting autonomy in those who are suffering from chronic and other illnesses The text takes a phenomenological approach to healthcare because it offers a rich and subtle way of thinking about how we know what we know and this applies to our knowledge and understanding of how healthcare works just as much as it does to all other kinds of knowledge For those in clinical practice this book provides a guide to the thinking behind person centred healthcare

Appreciative Healthcare Practice: A guide to compassionate, person-centred care Dr Gwilym Wyn Roberts,Dr Andrew Machon,2015-07-08 Written by a leading healthcare academic and an accredited international business coach this book takes

a new approach to one of the most crucial issues in healthcare how to care for patients appreciatively responsively and compassionately In the light of the findings of the Francis Report 2013 and at a time when healthcare services are under enormous pressure there is a clear and urgent need for such a book Despite the challenges of ill health the authors demonstrate that the opportunity is there for any healthcare practitioner to draw out what the patient needs and desires in line with the patient s own values purposes and beliefs This approach seeks to alleviate suffering and allows the patient to be more empowered and motivated to change discovering choice and possibility in times of adversity In this way the practitioner can help the patient increase their own resilience and resourcefulness At the same time the practitioner discovers their own ability to self care and self manage Aimed at healthcare students and practitioners at all levels Appreciative Healthcare Practice will provide a valuable and supportive learning resource for a wide range of individuals involved in caring Contents include Introduction Carers stories Compassionate and dignified care Professionalism on becoming a professional Applying appreciative inquiry in practice and education Creativity and care Applying the three eye model to healthcare Mindful healthcare practice The appreciative care worker and coach

Philosophical Health Luis de Miranda,2023-12-28 Bringing together leading international and interdisciplinary scholars this ground breaking volume examines the theory and practice of philosophical health in contemporary contexts of care broadly understood care for the self care for the other and care for the world But what do we mean by philosophical health Whilst this book does not seek to provide a normative definition as it explores disparate perspectives and encourages pluralism in philosophical ways of life one may envision philosophical health as a state of creative coherence between a person s or a group s way of thinking and their way of acting such that the possibilities for a good life are increased and the needs for flourishing satisfied An idea central to philosophical health is the concept of possibility Without a sense of self possibility and openness to the future health loses meaning and conversely pathologies are defined by various kinds of impossibilities As such philosophical health reconsiders care as a process of cultivating or pruning the compossible in embodied psychological and social terms of allowing things to re generate or in some cases to vanish Drawing on the history of philosophy phenomenology new materialism post colonialism but also a wide range of contemporary approaches to philosophical practice Philosophical Health sheds light on the understudied philosophical dimension of care and the healing dimension of philosophizing Advocating philosophy as a lived practice it uncovers the increasing relevance of philosophical health to contemporary debates on well being well belonging counselling and development **Patient-Centered**

Healthcare Eldo Frezza,2019-08-22 Patient centered care is a way of thinking and doing things that considers patients partners in the development of a healthcare plan designed to meet their specific needs It involves knowledge of the individual as a person and integrates that knowledge into their plan of care Patient centered care is central to the discussion of healthcare at the insurance and hospital level The quality of the service is evaluated more deeply from all the healthcare components including insurance payments It is the start of a new client and patient centered healthcare which is based on a profound respect for patients and the obligation to care for them in partnership with them Healthcare has been lacking a strategy to teach patients how to take care of themselves as much as they possibly can In countries with socialized healthcare patients don t go to the emergency room unless it is necessary they have a physician on call instead This affords more personalized care and avoids patients getting lost in the hospital system This book advocates the critical role of patients in the health system and the need to encourage healthy living We need to educate patients on how to be more self aware giving them the tools to better understand what they need to do to achieve healthy lifestyles and the protocols and policies to sustain a better life Prevention has always been the pinnacle of medical care It s time to highlight and share this approach with patients and involve them as active participants in their own healthcare This is the method on which to build the new healthcare for the next century Coaching for Person-Centred Healthcare Elaine Cook,Gilbert J. Greene,Joanne Maxwell,2024-10-31 This guide introduces a humanistic solution focused coaching model using lived experience to

demonstrate how profound changes in our healthcare experiences and system for patients and staff are possible while also supporting readers to develop their own coaching skills Combining research theory and practice shared through personal experience readers are introduced to solution focused dialogic tools for use in promoting person centred care The first section of the book introduces the coaching model and explores its theoretical and philosophical underpinnings drawing on theories from neuroscience neurobiology communication sciences humanistic psychology and positive psychology The second section of the book transitions from theory and research into clinical practice making evident the broad range of healthcare contexts and domains in which the humanistic solution focused approaches are implemented as well as the profound personal and professional implications associated with their use The third section of the book focuses on the lived experience of four people focusing on their interactions with healthcare before and after their coaching training emphasizing the difference a humanistic solution focused approach has made for them and their families The final section then turns to organizational change and explores how solution focused coaching provides insights perspectives and aspirations for system change This engaging text is ideal reading for healthcare professionals teachers and leaders looking to develop and improve the care they deliver the experiences of the people they are working with and the organizations they deliver it within

Person-centred Health Care Stephen

Buetow, 2016-06-10 Person centred health care is increasingly endorsed as a key element of high quality care yet in practice it often means patient centred health care This book scrutinizes the principle of primacy of patient welfare which although deeply embedded in health professionalism is long overdue for critical analysis and debate It appears incontestable because patients have greater immediate health needs than clinicians and the patient clinician encounter is often recognized as a moral enterprise as well as a service contract However Buetow argues that the implication that clinician welfare is secondary can harm clinicians patients and health system performance Revaluing participants in health care as moral equals this book advocates an ethic of virtue to respect the clinician as a whole person whose self care and care from patients can benefit both parties because their moral interests intertwine and warrant equal consideration It then considers how to move from values including moral equality in health care to practice for people in their particular situations Developing a genuinely inclusive concept of person centred care accepting clinicians as moral equals it also facilitates the coalescence of patient centred care and evidence based health care This reflective and provocative work develops a constructive alternative to the taken for granted principle of primacy of patient welfare It is of interest to students and academics in the health and caring sciences philosophy ethics medical humanities and health management
