**REMOTE CONTROL CAR STARTER**

## **AS-1200 OPERATING INSTRUCTIONS**

### **USE FOR VEHICLES WITH AUTOMATIC TRANSMISSIONS ONLY**

#### **BASIC OPERATIONS**

The remote control unit has two buttons. Button I is used to operate the door locks (if that option was installed) and Button II is for remote engine start.

To start the car by remote, you must ensure that the hood is closed, the key is not in the ignition and that the brakes aren't pressed. Press and hold Button II for about a second or for about 4 to 5 seconds if the Child Proof feature was enabled by your installer. The parking lights will come on to inform you that the unit has recognized your remote. Once the lights come on, release the button on the remote. Your vehicle will now start.

**NOTE:** Do not continue to press the remote once the parking lights activate. Pressing the remote continuously for 4 seconds will activate the "Cold Weather" mode and will not start the engine.

If the car doesn't start, AUTOSTART will shut off, wait a few seconds, then try to start the engine again. AUTOSTART will try to start the engine a total of two, three or four times (programmable) before giving up.

When the engine starts, the parking lights will stay on for the run time duration of 5, 15 or 25 minutes (programmable). If the engine stalls, AUTOSTART will try to start the engine again (maximum of 3 attempts).

With the engine running under remote control, enter the vehicle. Insert the key in the ignition and turn the key to the ON position. Do not turn the key to the START position with the engine running. Step on the brake and drive away. Stepping on the brake deactivates the remote starter.

**NOTE:** Make sure that you have the heater or air conditioner turned on before leaving your vehicle. AUTOSTART will warm or cool your car when starting by remote control.

#### **REMOTE DOOR LOCKS**

If your system was installed with remote door locks, you will be able to lock and unlock your doors using the remote control.

To unlock your doors, press and hold Button I until the parking lights flash twice to confirm that the doors are unlocked.

To lock your doors, press Button I on your remote until the parking lights flash once to confirm that the doors are locked.

#### **REMOTE TRUNK RELEASE OR GARAGE DOOR CONTROL**

AUTOSTART has the capability to control the trunk release or an external garage door opener system. If your unit was installed with the Trunk Release option, you can open the trunk using your remote. This is especially handy when you carry packages and need to open the trunk.

To open the trunk, press and hold Buttons I and II together for about a second. The parking lights will flash once to confirm the operation.

If your unit was installed to control an external garage door transmitter, AUTOSTART can open your garage door using your remote. You will then need to use only one remote control instead of two.

The garage transmitter can be activated while the ignition key is in the ON or OFF position while the trunk release operates only if the ignition key is not inserted or in the OFF position.

#### **STARTER KILL OPTION**

If your system was installed with the Starter Kill option, you will not be able to start your vehicle using the keys without first disarming the system. This option works with the Door Lock option. If you did not have the Door Lock option installed, ignore the references to the door lock/unlock operations below.

To disarm the Starter Kill System, press and hold Button I to unlock the doors. When the system has been disarmed, you will get two quick flashes through the parking lights.

**NOTE:** Locking the doors will rearm the starter kill unit.

Once the system has been disarmed, you will have approximately 45 seconds to insert the key in the ignition, turn it to the ON position and start the engine.

When the engine is turned off, the system will rearm in 45 seconds.

#### **IDLE MODE OPTION**

The Idle Mode Option can be enabled by your installer so that you can leave the vehicle unattended and the engine running for the engine run time. This is handy when you need to make a short stop or delivery without having to stop the engine and restart it. If your stop is longer than the engine run time, the engine will shut off automatically, similar to a remote start.

If this option was enabled at installation, you can activate Idle Mode by completing the following steps:

- 1) Ensure that the engine is running.
- 2) Hold Button II (or channel 1 to unlock doors if Ignition Lock is disabled) at least 2 seconds to activate Idle Mode. If the parking lights were OFF before activating Idle Mode, they will flash then remain ON to indicate the Idle Mode active state.
- 3) Remove the key. The engine will run for the run time programmed in Mode 2.
- 4) Exit the vehicle and lock the doors.
