World Development Indicators 2015 World Bank, 2015-04-10 World Development Indicators 2015 World Development Indicators 2015 provides a compilation of relevant high quality and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers, and citizens find and use data related to all aspects of development, including those that help monitor progress toward the World Bank Group's two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators: world view, people, environment, economy, states and markets, and global links. As in past editions, World Development Indicators reviews global progress toward the Millennium Development Goals (MDGs) and provides key indicators related to poverty. WDI 2015 includes a selection of the most popular indicators across 214 economies and 14 country groups, organized into six WDI themes: Thematic and regional highlights providing an overview of global development trends; An in-depth review of the progress made toward achieving the Millennium Development Goals; A user guide describing resources available online and on mobile apps; A complementary online data analysis tool is available this year to allow readers to further investigate global, regional, and country progress on the MDGs; data.worldbank.org/mdgs. Each of the remaining sections includes an introduction, six stories highlighting specific global, regional, or country trends, and a table of the most relevant and popular indicators for that theme, together with a discussion of indicator compilation methodology. WDI DataFinder Mobile App: Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets using iOS, Android, and BlackBerry, available in four languages: English, French, Spanish, and Chinese. Use the app to browse data using the structure of the WDI, visually compare countries and indicators, create, edit, and save customized tables, charts, and maps, share what you create on Twitter, Facebook, and via email.

Fombad,Nico Steytler,2021-03-18 The third wave of democracy that reached African shores at the end of the Cold War brought with it a dramatic decline from 1990 onwards in dictatorships military regimes one party governments and presidents for life Multiparty democracy was at the core of the constitutional revolutions that swept through most of Africa in those watershed years However that wave is either losing momentum or receding or being reversed in its entirety This volume examines democracy and elections in Africa a focus motivated by two concerns First after 30 years it is important to take stock of the state of constitutional democracy on the continent The democratic gains of the 1990s and 2000s seem to be falling by the wayside with the evidence mounting that regimes are concealing authoritarianism under the veneer of elections doing so in an international context where populist regimes are on the rise and free and fair multiparty elections are consequently no longer a given It is becoming a battle to protect and retain constitutional democracy The second reason for this volume s focus on democracy and elections is that multiparty democracy is essential for the proper functioning of the state in addressing the major problems facing Africa internal conflict inequality and lack of development and poor governance and corruption The focus of this volume is thus on how competitive politics or multiparty democracy can be

realized and how through competition such politics could lead to better policy and practice outcomes **Seed system of Pakistan: Policy challenges and prospects** Rana, Abdul Wajid, Gill, Sitara, Akram, Iqra, 2022-09-26 The seed industry in Pakistan has undergone significant developments since the 1950s and has transitioned from Green Revolution to Gene Revolution The 2015 amendment in the Seed Act 1976 and the enactment of Plant Breeders Rights Act and Rules have provided long awaited intellectual property protection for proprietary seed Notwithstanding this fundamental change the challenge of effective enforcement of intellectual property rights remains This paper presents how the seed industry has evolved over the years through evaluating the regulatory and institutional framework along with looking into the major challenges that still plague the seed system of Pakistan It also explores how the private sector can be incentivized to invest in the seed sector while protecting the farmers rights Findings reveal that there seems to be a lot of scope for strengthening the seed system of Pakistan via encouraging private sector participation mainly through developing proactive markets with strong institutional mechanism along with scientific and time bound regulatory approval framework An appraisal of the international best practices divulges that technological backstopping developing public private partnerships building institutional capacity for effective enforcement of regulatory regime and availability of information to farmers for selecting quality seed are equally vital for creating a well functioning seed system in Pakistan
