Computer Networking and Scholarly Communication in the Twenty-First-Century

University Teresa M. Harrison, Timothy Stephen, 1996-04-04 This book explores the various ways in which computer networking and more specifically the Internet is changing the practices the structure and the products of academic scholarship It considers research teaching and dissemination of knowledge across a range of disciplines in the humanities sciences and social sciences in order to identify particular uses of networking that will come to constitute the academic world of the future The contributors consider such themes as how networking and particular software environments can be used to support inquiry within research specialties and how scholars in diverse disciplines respond to the availability of new networked channels of scholarly communication In the context of education they argue that networking can reconfigure the process of learning encompassing new audiences new relationships with teachers and new learning skills adapted for the network environment The products of such new configurations are also discussed The future of electronic journal publication is considered by innovators who have designed some of the first experiments in refereed electronic journal publication Finally the new responsibilities and roles of the academic library and academic publishers in a networked environment are debated
