Environmental Connections Kathleen Bajorek DeBettencourt, 2000 A guide intended to help educators and students find resources on environmental topics that will enable them to examine issues in greater depth than typical textbooks allow. Chapters are divided by subject matter: water, biodiversity, air quality, global climate change, energy, forests, food and agriculture, soils, mineral resources, population studies, waste management, toxicology, and risk and environmental decision making. Guide appears to be most helpful for teachers in upper grade levels. **Report summaries** United States.
