The World Wide Web and Databases Dan Suci, Gottfried Vossen,2003-06-29 With the development of the World Wide Web data management problems have branched out from the traditional framework in which tabular data is processed under the strict control of an application and address today the rich variety of information that is found on the Web considering a variety of exible environments under which such data can be searched classified and processed Database systems are coming forward today in a new role as the primary backend for the information provided on the Web Most of today's Web accesses trigger some form of content generation from a database while electronic commerce often triggers intensive DBMS based applications The research community has begun to revise data models query languages data integration techniques dext query processing algorithms and transaction concepts in order to cope with the characteristics and scale of the data on the Web New problems have been identified among them goal oriented information gathering management of semi structured data or database style query languages for Web data to name just a few The International Workshop on the Web and Databases WebDB is a series of workshops intended to bring together researchers interested in the interaction between databases and the Web This year's WebDB 2000 was the third in the series and was held in Dallas Texas in conjunction with the ACM SIGMOD International Conference on Management of Data

**Biocomputing 2007 - Proceedings Of The Pacific Symposium** Russ B Altman, A Keith Dunker, Lawrence Hunter, Teri E Klein, Tiffany A Jung,2006-12-11 The Pacific Symposium on Biocomputing PSB 2007 is an international multidisciplinary conference for the presentation and discussion of current research in the theory and

application of computational methods in problems of biological significance Presentations are rigorously peer reviewed and are published in an archival proceedings volume PSB 2007 will be held January 3-7 2007 at the Grand Wailea Maui Tutorials will be offered prior to the start of the conference PSB 2007 will bring together top researchers from the US the Asian Pacific nations and around the world to exchange research results and address open issues in all aspects of computational biology It is a forum for the presentation of work in databases algorithms interfaces visualization modeling and other computational methods as applied to biological problems with emphasis on applications in data rich areas of molecular biology The PSB has been designed to be responsive to the need for critical mass in sub disciplines within biocomputing For that reason it is the only meeting whose sessions are defined dynamically each year in response to specific proposals PSB sessions are organized by leaders of research in biocomputing s hot topics In this way the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field      9th International World Wide Web Conference
