- Tibialis Posterior
- Flexor digitorum longus
- Flexor hallucis longus
- Calcaneal tendon

Tibialis posterior tendon reconstruction is a surgical procedure aimed at restoring function to the tibialis posterior tendon, which runs along the inner side of the ankle and supports the arch of the foot. This surgery is typically recommended for individuals suffering from posterior tibial tendon dysfunction (PTTD), also known as adult-acquired flatfoot. PTTD occurs when the tendon becomes inflamed, stretched, or torn, resulting in the collapse of the foot's arch and pain during walking or standing.

Gould, Mason N. Florence, 2013-12-15 This book provides an analytical approach to the practice of Orthopedic Foot and Ankle Surgery, edited and primarily written by a world recognized authority in this field who has 41 years of experience in academic and private medical practice. The contributors in this book include nationally recognized men and women who are colleagues or trained with the Editor in Chief and share much of his philosophy in the management of complex surgical issues. The book is not comprehensive and does not categorize an historical compendium of management and surgical techniques. Rather, it emphasizes the authors' logical approach to the problems presented and the surgical techniques utilized, including the management of failures and complications. The book covers a wide range of issues concerning the practice of Orthopedic Foot and Ankle, including history, taking physical examination, collation of data, making diagnoses, how to deal with patients, how to manage complications, ethical issues, referring physicians and when to refer. How to set up an operating room, manage a clinic and working with fellows and residents are also a part of the initial segment of the book as well as chapters on the business management of an office and how to conduct clinical and basic research. The following sections include management problems of approaches to orthopedic problems of the forefoot, midfoot, hindfoot and ankle. Sections also include those concerning pediatric and adolescent problems, the rheumatoid and diabetic patients, neuromuscular diseases, nerve problems and trauma to the foot and ankle. Each section is written by subspecialists in the fields concerned. Reconstructive Knee Surgery Douglas W. Jackson, 2008 The newly expanded edition of this highly acclaimed volume describes the latest techniques for reconstructive knee surgery. The world's foremost experts share their preferred techniques in step by step detail and offer tips for improving results. The
