Maximizing Local Government Impact on Community Health Initiatives Karolina Sobczyk, Marlena Robakowska, 2025-09-17 Local government units play a pivotal role in shaping and enhancing public health a common societal good that requires continuous strengthening The influence of local governments extends beyond mere statistics of morbidity and mortality it encompasses the reduction of health adverse behaviors that undermine health security and social cohesion Despite the recognized importance of local government involvement in health initiatives there remains a significant gap in understanding the full extent of their impact and the best practices for maximizing their effectiveness Recent studies have highlighted the potential of local governments to drive health improvements through targeted programs such as vaccination campaigns school based health initiatives and policies affecting transportation consumption and access to health promoting resources However there is a pressing need for more comprehensive research to mobilize local governments towards proactive health interventions and to identify strategies that can be effectively implemented at the community level This research topic aims to explore the multifaceted benefits of local government activities in influencing population health

By examining the links between local government actions and health outcomes this research seeks to uncover new insights into how local authorities can effectively contribute to public health The goal is to stimulate scholarly discourse and provide evidence based recommendations that can guide local governments businesses researchers and individuals in their efforts to enhance community health capacity

Research on Teaching Strategies and Skills in Different Educational Stages Pedro Gil-Madrona, Linda Saraiva, Luisa Losada-Puente, 2025-03-19

The teaching practice becomes a reciprocal activity in the classroom when teachers apply their creativity and their knowledge resulting from research and scientific evidence in the didactic teaching process with the purpose of strengthening in the students the key competencies of their training turning students at the core of the didactic process Teaching strategies must be articulated from previous research and planning and designed sequentially to promote real and interesting learning scenarios and thereby achieve significant learning From this perspective of teaching learning strategies the reciprocal interaction between the student and the teacher becomes the focus of attention with a playful motivating interesting and rewarding approach for the learner The role of the teacher is conceived as fundamental in the teaching process to achieve the link between teaching learning and evaluation strategies For this reason multidisciplinary studies are welcome from all stages of the educational system with quantitative qualitative and mixed approaches and reviews promoting good teaching practices of reflection and innovation from these studies
