

If your toilet tank has a triangular flush valve hole, as shown in this illustration, remove the red seal attached to the flush valve bottom. Discard the red seal.

Attach the black seal to the flush valve bottom so the large flat surface faces away from the flush valve.

Fig. #9

Position the valve lugs so they face inward.

Insert the flush valve into the tank bottom hole, and align it in the same position as the original flush valve.

Swing the valve lugs outward so they extend under the tank hole bottom edge. Hold the valve lugs in place with a needlenose pliers. Evenly tighten the valve lugs with a phillips screwdriver. If you experience difficulty keeping the valve lugs positioned as shown, remove the rim feed hose. Then insert the rim feed hose into the flush valve hole to position the valve lugs and hold them in place. Tighten the valve lugs. Re-install the rim feed hose.

CAUTION: Risk of product damage. Do not overtighten the valve lugs. Overtightening may result in cracking or chipping of the vitreous china tank.

Fig. #10

Rialto Repair Manual
