Chaos and Life Richard J. Bird, 2003-11-26 Why in a scientific age do people routinely turn to astrologers mediums cultists and every kind of irrational practitioner rather than to science to meet their spiritual needs The answer according to Richard J Bird is that science especially biology has embraced a view of life that renders meaningless the coincidences serendipities and other seemingly significant occurrences that fill people s everyday existence Evolutionary biology rests on the assumption that although events are fundamentally random some are selected because they are better adapted than others to the surrounding world This book proposes an alternative view of evolving complexity Bird argues that randomness means not disorder but infinite order Complexity arises not from many random events of natural selection although these are not unimportant but from the playing out of chaotic systems which are best described mathematically When we properly understand the complex interplay of chaos and life Bird contends we will see that many events that appear random are actually the outcome of order *Civil Procedure Reports* ,1897 **The zoologist** ,1886 **The Irish Jurist** ,1852
