Furnell,2007-03-06 Many existing titles provide introductions to security concepts and technologies However they are typically presented in the style of either academic textbooks or how to guides A business manager for example will be more interested in the problems that he may face and their impact before being told about the technological solutions The comprehensively researched text makes reference to many real life examples to illustrate the points being made which help to provide evidence of security incidents and the consequences The book helps to answer the question of why we particularly if working in corporate roles should care about IT security by presenting examples of how insecure systems can be open to exploitation The aim is to instil readers with a sense of security awareness and foster a more security conscious IT culture The text does not focus upon the technological solutions required it instead concentrates upon the variety of possible vulnerabilities and the likely consequences [Design for the Changing Educational Landscape](#) Andrew Harrison,Les Hutton,2013-10-15 The whole landscape of space use is undergoing a radical transformation In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide the rise of distributed space In the learning environment the social political economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching and a wide acceptance of the importance of learning as the core of the community resulting in the blending of all aspects of learning into one seamless experience This book attempts to look at all the forces driving the provision and

pedagogic performance of the many spaces real and virtual that now accommodate the experience of learning and provide pointers towards the creation and design of learning centred communities Part 1 looks at the entire learning universe as it now stands tracks the way in which its constituent parts came to occupy their role assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform It shows that what is required is innovation within the spaces and integration between them Part 2 finds many examples of innovation in evidence across the world in schools the higher and further education campus and in business and cultural spaces but an almost total absence of integration Part 3 offers a model that redefines the learning landscape in terms of learning outcomes mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale By encouraging stakeholders to creating an events based rather than space based identity the book hopes to point the way to a fully integrated learning landscape a learning community
