

Meeting your Specific Demands

The Aficio™2022/2027 are fully upgradeable copier-based devices. By adding optional print/can/fax functionality and other options, you can create the ideal device to suit your precise demands. A clever all-in system that grows with your business, without the need for bulky and expensive stand-alone devices.

Using Web Image Monitor you can check the status of a single networked peripheral and monitor the document server as well as paper/toner supply through a common web browser.

Copy Genius

Thanks to the 'scan once, copy many' principle, your originals are scanned only once, stored into memory and reproduced from there. This saves time and gives you high-quality output. The Aficio™2022/2027 also boast a very short warm-up time and impressive first output speed thanks to the QSU (quick start up) technology. In addition, duplexing is just as fast as simplex copying. Now everyone can save on paper and energy, while benefiting from time-saving productivity.

Connect to Any Network

The Aficio™2022/2027 integrate with virtually any network environment. A Network Interface Board (NIB) is embedded in the printer/scanner module. An IEEE 1394 interface board can be added to increase the systems' output speed, whereas the USB2.0 option enhances connectivity flexibility. Wireless LAN enables printing across the network without the need for network cables. Opting for Bluetooth ideally allows you to connect devices outside the network.

Efficient Distribution

Using the 'scan to e-mail' function, you can send scanned files to any e-mail address in the world without the need for a designated server or extra software. Via LDAP you have direct access to the e-mail address book of your company's e-mail system. You can also manually update the e-mail address book

from the systems' operation panel or from your PC, via Web Image Monitor. To prevent unauthorised users from sending your document, you can rely on the client folder protection function. Before transmission there is login user name/password encryption and you receive acknowledgement via e-mail to confirm successful sending. In addition to 'scan to e-mail', you can distribute documents directly from the machine to a client folder on the network by making use of the 'scan to folder' function.

Cost-saving Internet Faxing

Using the Internet for long distance faxing has major advantages. By sending fax messages to PCs in e-mail format, you reduce your costs while enhancing your communication capabilities.

Optimal Document Management

To be able to handle all jobs professionally, several document management utilities are available. For example, you can store frequently used print, copy, fax and scan documents for re-use on the machine's document server. Via the bundled DesktopBinder™ V2 Lite or Web Image Monitor software, you can view these stored documents from your PC. Using DesktopBinder™ V2 Lite you can merge documents of different formats into one file and view, manage, print and re-distribute the information digitally.

Via the large LCD touch screen, all jobs - whether print, copy, fax or scan - are programmed in no time.
