Hadler,2017-01-30 In the early sixties crowds gathered to watch rites of destruction from the demolition derby where makeshift cars crashed into each other for sport to concerts where musicians destroyed their instruments to performances of self destructing machines staged by contemporary artists Destruction in both its playful and fearsome aspects was ubiquitous in the new Atomic Age This complicated subjectivity was not just a way for people to find catharsis amid the fears of annihilation and postwar trauma but also a complex instantiation of ideological crisis in a time with some seriously conflicted political myths *Destruction Rites* explores the ephemeral visual culture of destruction in the postwar era and its links to contemporary art It examines the demolition derby games and toys based on warfare playgrounds situated in bomb sites and the rise of garage sales where goods designed for obsolescence and destined for the garbage heap are reclaimed and repurposed by local communities Mona Hadler looks at artists such as Jean Tinguely Niki de Saint Phalle Martha Rosler and Vito Acconci to expose how the 1960s saw destruction construction and the everyday collide as never before During the Atomic age whether in the public sphere or art museums destruction could be transformed into a constructive force and art objects and performances often oscillated between the two **Ritual Embodiment in Modern Western Magic** Damon

Zacharias Lycourinos,2017-11-15 In the Western world magic has often functioned as an umbrella term for various religious beliefs and ritual practices that seek to influence events by harnessing supernatural power The definition of these myriad occult and esoteric traditions have however usually come from those that are opposed to its practice notably authorities in religious legal and intellectual spheres This book seeks to provide a new perspective directly from the practitioners of modern Western magic by exploring how a distinctive mode of embodiment and consciousness can produce a transition from an ordinary to a magical worldview Starting with an introduction to the study of magic in the Western academy the book then presents the author s own participant observation of five ethnographic case studies of modern Western magic The focus of these ethnographic case studies is directed towards ideas and methods the informants employ to self legitimise and self represent as magicians It concludes by discussing the phenomenological implications and issues around embodiment that are inherent to the contemporary practice of magic This is a unique insight into the lived experience of practitioners of modern magic As such it will be of keen interest to scholars of the Occult and New Religious Movements as well as Religious Studies academics examining issues around the embodiment and the anthropology of religion **Divine Egypt** Diana Craig

Religion in Japanese Daily Life David C. Lewis, 2017-09-22 Are Japanese people religious and if so in what ways David Lewis addresses this question from the perspective of ordinary Japanese people in the context of their life cycles and explores why they engage in religious activities He not only discusses how Japanese people engage in different religious practices as they encounter new events in their lives but also analyses the attitudes and motivations behind their behaviour Activities such as fortune telling religious rites in the workplace ancestral rites and visits to shrines and temples are actually engaged in by many people who view themselves as non religious but express their motivations in terms other than the conventional religious ones This book outlines the religious options available and assesses why people choose particular religious activities

at various times in their lives or in specific circumstances The author challenges some widespread assumptions about religion in urban and industrial contexts and also shows how some of the underlying motivations behind Japanese behaviour are expressed both in religious and non religious forms The Book of Amos M. The collected papers in this volume tie together Murray's research into the history or historiography of archaeological thought and his commitment to understanding the material culture of the past to write history. They provide a cross section of philosophical enquiries and substantive research from epistemological studies of shared lexicons and important debates in the history of archaeological thought to the minutiae of material culture studies. Several papers explicitly and implicitly explore one of Murray's great interests: the role of heritage preservation in our exploration of the past including dedicated tertiary training programs for Indigenous Australians to manage research and protect their own Country. The book is divided into four parts: History, Archaeology, Philosophy, and Heritage, offering an interdisciplinary approach to the study of the past. This volume would be of interest to archaeologists, historians, philosophers of archaeology, and heritage scholars.

Art of the Yellow Springs Wu Hung, 2015-02-15 We might think the Egyptians were the masters of building tombs, but no other civilization has devoted more time and resources to underground burial structures than the Chinese. For at least five thousand years, from the fourth millennium B.C.E. to the early twentieth century, the Chinese have been building some of the world's most elaborate tombs and furnishing them with exquisite objects. It is these objects and the concept of the tomb as a treasure trove that *The Art of the Yellow Springs* seeks to critique, drawing on recent scholarship to examine memorial sites the way they were meant to be experienced, not as a mere store of individual works but as a work of art itself. Wu Hung bolsters some of the new trends in Chinese art history that have been challenging the conventional ways of studying funerary art. Examining the interpretative methods themselves that guide the study of memorials, he argues that in order to understand Chinese tombs, one must not necessarily forget the individual works present in them, as the beautiful color plates here will prove. But consider them along with a host of other art historical concepts. These include notions of visibility, viewership, space, analysis, function, and context. The result is a ground-breaking new assessment that demonstrates the amazing richness of one of the longest running traditions in the whole of art history.

Making Media Theory Marcel O'Gorman, 2020-10-29 *Making Media Theory* is about the study, practice, and hands-on design of media theory. It looks at experimental research methods and engages in media analysis, inviting readers to respond to and shape the materiality of media while carefully considering the implications of living in a technoculture. The author walks readers through the creation of digital objects to think with, where critical design practices serve as tools for exploring social and philosophical issues related to technological being and becoming.

So Great a Salvation Jon C. Laansma, George H. Guthrie, Cynthia Long Westfall, 2019-06-27 This volume presents a dialogue between historians, exegetes, and theologians on the background and key themes of the atonement in Hebrews. Presenting a range of differing perspectives and contributing to the renewed conversation between biblical and theological scholarship, the argument is structured in two parts: contexts and themes within Hebrews. Focusing on atonement not only in the Old Testament but also in the Greco-Roman world and touching on themes such as sacrifice, plight, and solution, and faith, these contributions shed light on the concept of the atonement in a directly scriptural way. The whole is a

definitive collection of studies on the atonement in Hebrews that will be of service well beyond the confines of Hebrews specialists a collection as important for what it says about the atonement and the 21st century church as for what it says about Hebrews

Sacred Signs in Reformation Scotland Stephen Mark Holmes, 2015 Sacred Signs in Reformation Scotland is the first study of how public worship was interpreted in Renaissance Scotland and offers a radically new way of understanding the Scottish Reformation It first defines the history and method of liturgical interpretation using the methods of medieval Biblical exegesis to explain worship then shows why it was central to medieval and early modern Western European religious culture The rest of the book uses Scotland as a case study for a multidisciplinary investigation of the place of liturgical interpretation in this culture Stephen Mark Holmes uses the methods of book history to discover the place of liturgical interpretation in education sermons and pastoral practice and also investigates its impact on material culture especially church buildings and furnishings A study of books and their owners reveals networks of clergy in Scotland committed to the liturgy and Catholic reform especially the Aberdeen liturgists Holmes corrects current scholarship by showing that their influence lasted beyond 1560 and suggests that they created the distinctive religious culture of North East Scotland later a centre of Catholic recusancy Episcopalianism and Jacobitism The final two chapters investigate what happened to liturgical interpretation in Scottish religious culture after the Protestant Reformation of 1559 60 showing that while it declined in importance in Catholic circles a Reformed Protestant version of liturgical interpretation was created and flourished which used exactly the same method to produce both an interpretation of the Reformed sacramental rites and an anti commentary on Catholic liturgy The book demonstrates an important continuity across the Reformation divide arguing that the Scottish Reformation is best seen as both Catholic and Protestant with the reformers on both sides having more in common than they or subsequent historians have allowed
