Fleming,2013-07-15 Why spiritual and supernatural yearnings even investigations into the occult flourished in the era of rationalist philosophy In *The Dark Side of the Enlightenment* John V Fleming shows how the impulses of the European Enlightenment generally associated with great strides in the liberation of human thought from superstition and traditional religion were challenged by tenacious religious ideas or channeled into the darker pursuits of the esoteric and the occult His engaging topics include the stubborn survival of the miraculous the Enlightenment roles of Rosicrucianism and Freemasonry and the widespread pursuit of magic and alchemy Though we tend not to associate what was once called alchemy with what

we now call chemistry Fleming shows that the difference is merely one of linguistic modernization Alchemy was once the chemistry of Arabic derivation and its practitioners were among the principal scientists and physicians of their ages No point is more important for understanding the strange and fascinating figures in this book than the prestige of alchemy among the learned men of the age Fleming follows some of these complexities and contradictions of the Age of Lights into the biographies of two of its extraordinary offspring The first is the controversial wizard known as Count Cagliostro the Egyptian freemason unconventional healer and alchemist known most infamously for his ambiguous association with the Affair of the Diamond Necklace which history has viewed as among the possible harbingers of the French Revolution and a major contributing factor in the growing unpopularity of Marie Antoinette Fleming also reviews the career of Julie de Kr dener the sentimental novelist Pietist preacher and political mystic who would later become notorious as a prophet Impressively researched and wonderfully erudite this rich narrative history sheds light on some lesser known mental extravagances and beliefs of the Enlightenment era and brings to life some of the most extraordinary characters ever encountered either in history or fiction

Hearts Desires and Dark Embraces Margaret L. Carter,2017-09-14 When Margaret L Carter first read Dracula at the age of twelve her spontaneous reaction was to wonder how the undead Count saw the events in which he was portrayed as the villain She s always been fascinated with the monster s viewpoint and relationships between human and nonhuman beings Most of the stories in this collection can be described as romances and all involve love and passion in some form Here you ll encounter vampires elves ghosts and at least one human monster hybrid The vampire stories in the first half of the book are part of an ongoing series in which the creatures we know as vampires belong to a naturally evolved nonhuman species secretly living among us Readers can get better acquainted with them in *Crimson Dreams Sealed in Blood and Passion in the Blood*

On the Dark Side of the Moon Mike Medberry,2012-10-01 Distributed by the University of Nebraska Press for Caxton Press In the spring of 2000 Mike Medberry a longtime advocate of conservation with American Lands the Wilderness Society and the Idaho Conservation League suffered a stroke in the remote wilderness of the Craters of the Moon National Monument in Idaho He was rescued after nearly a full day lying alone and contemplating death in one of the harshest yet most beautiful landscapes in the lower forty eight states Medberry was flown to a nearby hospital about the same time that Interior Secretary Bruce Babbitt on behalf of President Clinton came to Craters of the Moon to support protecting three quarters of a million acres as a unique national monument a conservation effort in which Medberry himself had already been personally involved This story interweaves Medberry s own struggle to speak walk and think with the struggle to protect this brutal lava bound but for him gentle landscape Medberry s recovery from the stroke and his struggle to protect Craters of the Moon is a story of renewal restoration accommodation and ultimately of finding workable compromises to some of life s most difficult problems
