Languages of Instruction for African Emancipation Birgit Brock-Utne,Rodney Kofi Hopson,2005 *Languages of Instruction*

for African Emancipation is a collection of case studies from seven African countries poses questions such as What alternatives are there for educational language policies towards African emancipation What efforts have governments made to change the language policy in favour of African languages and how far have they succeeded What challenges do African learners face when it comes to current language of instruction policies The authors reject a language education policy that neglects the multilingualism existing in Africa that reinforces patterns of privilege that existed in the colonial era further entrenching the schism between the elite and the masses They give short shrift to the new justification of the unjustifiable status accorded to English in Africa as the language of globalisation suggesting that it is not relevant to the vast majority of African lives and their human development The sum of thoughts presented suggests that the answer to the language question provides the key to development challenges and further emancipation of the African peoples which it is argued is at the same time a question that will determine whether Africa will remain a recognisable and distinctive cultural component of humanity or whether Africans will cease to exist culturally as Africans

Ideophones Erhard Friedrich Karl Voeltz, Christa

Kilian-Hatz, 2001-01-01 The present volume represents a selection of papers presented at the International Symposium on Ideophones held in January 1999 in St Augustin Germany They center around the following hypotheses Ideophones are universal and constitute a grammatical category in all languages of the world ideophones and similar words have a special dramaturgic function that differs from all other word classes they simulate an event an emotion a perception through language In addition to this unique function a good number of formal parallels can be observed The languages dealt with here display strikingly similar patterns of derivational processes involving ideophones An equally widespread common feature is the introduction of ideophones via a verbum dicendi or complementizer Another observation concerns the sound symbolic behavior of ideophones Thus the word formation of ideophones differs from other words in their tendency for iconicity and sound symbolism Finally it is made clear that ideophones are part of spoken language the language register where gestures are used rather than written language

Onomastics is an area of scholarly interest that has grown considerably in importance in recent years. Consequently the 27th International Congress of Onomastic Sciences held in 2021 in Kraków, Poland, gathered scholars from all over the world active in all subfields of onomastic enquiry as well as those exploring the areas bordering on other disciplines of the humanities. It thus became a venue for presenting state of the art research in the study of proper names, proposing novel approaches and opening new vistas for future research. The present work is the second of the three volumes of conference proceedings that were the fruit of the congress. Devoted to personal naming, it contains 28 individual articles contributed by 32 scholars. Some of them study recent fashions in name giving in countries as diverse as Bulgaria, Japan, Latvia, Lithuania or Sweden. Others explore historical trends in given name choice exemplified by Estonia or the Netherlands. Family names are represented by the analyses of married names in Hungary, of the surnames of Zagreb Jews, of German surnames in Latvia and the Carpathian Basin or of changes of foreign sounding surnames in Sweden. Unconventional naming proved scientifically fruitful too, as can be seen in the chapters on village bynames in Romania or student nicknames in Russia. Finally, there are researchers who provide a general overview of naming patterns in countries as varied as Botswana and Hungary or Romania and China. The opportunities offered by the application of new technology to onomastic research are explored in relation to the name stock in Denmark and the Netherlands. Simultaneously, these technologies may also themselves lead to the creation of novel objects of study, a case in point being Russian Internet usernames. Anthroponymic data may inform non onomastic research as well; for instance, they can offer insight into a country's history or ethnic composition, as evidenced by texts dealing with personal naming in Hungary or Ukraine. The volume is complemented by articles whose focus is the interface of onomastics and pragmatics, phonetics, prosody and gender studies, drawing on examples drawn from Dutch, Japanese, Romanian, Russian, Spanish and Swedish. The book is a must not only for onomasticians but also for researchers in related disciplines ranging from history via human geography or philosophy of language to social studies. However, professionals active in naming will find it useful as well, since it provides a much needed supranational perspective and enables cross cultural comparisons.
