Power from Below in Premodern Societies T. L. Thurston, Manuel Fernández-Götz, 2021-10-21 This volume challenges traditional narratives on power moving away from elite centered models and focusing instead on the archaeology of commoners

Identity, Oppression, and Diversity in Archaeology Laura E. Heath-Stout, 2024-10-31 Identity Oppression and Diversity in Archaeology documents how racism classism sexism heterosexism and ableism affect the demographics of archaeology and discusses how knowledge that archaeologists produce is shaped by the discipline's demographic homogeneity Previous research has shown that like many academic fields archaeology is numerically dominated by straight white cisgender people and those in positions of authority are predominantly men This book examines how and why those demographic trends persist It also elucidates how individual archaeologists' social identities shape the research they conduct and therefore how our demographics affect and limit our knowledge production on a disciplinary scale It explains how through unflinching reflection proactive policymaking and sincere community building we can build a diverse and inclusive discipline This book will appeal to archaeologists who have an interest in diversity and inclusion within the discipline as well as scholars in other disciplines who are engaged in research on diversity in academia

Gender and Anthropology Frances E. Mascia-Lees, Nancy Johnson Black, 2016-11-11 As an early reviewer wrote This is one of the clearest most concise statements on social theory in general let alone on gender that I have ever read Now updated Mascia Lees and Black continue to expertly trace how anthropologists have used different theoretical orientations to examine the nature and determinants of gender roles and gender inequality From the nineteenth century on anthropologists have used different theoretical orientations to understand the emotionally charged topic of gender With an insightful look at evolutionary materialist psychological structuralist poststructural sociolinguistic and self reflexive approaches this distinctive module also examines how these approaches best explain gender and sexual oppression in a global world The authors pack great amounts of valuable information into such a slim volume yet leave readers with digestible material that does more than cover the surface of anthropological perspectives on gender roles and stratification Readers gain insights and tools to develop their own critical analyses of gender

History and Approaches to Heritage Studies Phyllis Mauch Messenger, Susan J. Bender, 2019-01-21 This volume contributes to scholarship on the theory and practice of heritage with a focus on pedagogy It is an important collection at the intersection of theory practice and teaching This work intervenes in a broader discourse on the relevance of archaeology in education and the tensions between education for democracy and justice and the skills based economy

Subjects and Narrative in Archaeology Ruth M. Van Dyke, Reinhard Bernbeck, 2015-04-03 Seeking to move beyond the customary limits of archaeological prose and representation Subjects and Narratives in Archaeology presents archaeology in a variety of nontraditional formats The volume demonstrates that visual art creative nonfiction archaeological fiction video drama and other artistic pursuits have much to offer archaeological interpretation and analysis Chapters in the volume are augmented by narrative poetry paintings dialogues online databases videos audio files and slideshows The work

will be available in print and as an enhanced ebook that incorporates and showcases the multimedia elements in archaeological narrative While exploring these new and not so new forms the contributors discuss the boundaries and connections between empirical data and archaeological imagination Both a critique and an experiment *Subjects and Narratives in Archaeology* addresses the goals advantages and difficulties of alternative forms of archaeological representation Exploring the idea that academically sound archaeology can be fun to create and read the book takes a step beyond the boundaries of both traditional archaeology and traditional publishing

Discovering World Prehistory Mark Q. Sutton, 2022-02-27 *Discovering World Prehistory* introduces the general field of archaeology and highlights for students the difference between obtaining data basic archaeology and interpreting those data into a prehistory a coherent model of the past The opening section of the book covers the history methods and techniques of archaeology to provide a detailed examination of archaeological investigation It highlights the excitement of archaeological discovery and how archaeologists analyze and interpret evidence The second half covers global prehistory and shows how archaeological data is interpreted through theoretical frameworks to create a picture of the past Starting with human evolution chapters detail the key stages from around the world of prehistory finishing with the transition to post prehistoric societies Including chapter overviews highlight boxes chapter summaries key concepts and suggested reading *Discovering World Prehistory* is designed to support introductory courses in archaeology and allows students to experience both methods and interpretation offering a perfect introduction to the discipline

Researching the Archaeological Past through Imagined Narratives Daniël van Helden, Robert Witcher, 2019-11-26 Archaeological interpretation is an imaginative act Stratigraphy and artefacts do not tell us what the past was like that is the task of the archaeologist The diverse group of contributors to this volume address the relationship between archaeology and imagination through the medium of historical fiction and fictive techniques both as consumers and as producers The fictionalisation of archaeological research is often used to disseminate the results of scholarly or commercial archaeology projects for wider public outreach Here instead the authors focus on the question of what benefits fiction and fictive techniques as inspiration and method can bring to the practice of archaeology itself The contributors a mix of archaeologists novelists and other artists advance a variety of theoretical arguments and examples to advance the case for the value of a reflexive engagement between archaeology and fiction Themes include the similarities and differences in the motives and methods of archaeologists and novelists translation empathy and the need to humanise the past and diversify archaeological narratives The authors are sensitive to the epistemological and ethical issues surrounding the influence of fiction on researchers and the incorporation of fictive techniques in their work Sometimes dismissed as distracting just so stories or even as dangerously relativistic narratives the use of fictive techniques has a long history in archaeological research and examples from the scholarly literature on many varied periods and regions are considered The volume sets out to bring together examples of these disparate applications and to focus attention on the need

for explicit recognition of the problems and possibilities of such approaches and on the value of further research about them

Encyclopedia of Women in World Religions Susan de-Gaia, 2018-11-16 This reference offers reliable knowledge about women's diverse faith practices throughout history and prehistory and across cultures. Across the span of human history, women have participated in world building and life sustaining cultural creativity, making enormous contributions to religion and spirituality. In the contemporary period, women have achieved greater equality with more educational opportunities, female role models in public life and opportunities for religious expression than ever before. Contemporaneously with this increased visibility, women are actively and energetically engaging with religion for themselves and for their communities. Drawing on the expertise of a range of scholars, this reference chronicles the religious experiences of women across time and cultures. The book includes sections on major religions as well as on spirituality, African religions, prehistoric religions and other broad topics. Each section begins with an introduction followed by reference entries on specialized subjects along with excerpts from primary source documents. The entries provide numerous suggestions for further reading and the book closes with a detailed bibliography.

The Routledge Companion to Ecstatic Experience in the Ancient World Diana Stein, Sarah Kielt Costello, Karen Polinger Foster, 2021-12-31 For millennia, people have universally engaged in ecstatic experience as an essential element in ritual practice, spiritual belief and cultural identification. This volume offers the first systematic investigation of its myriad roles and manifestations in the ancient Mediterranean and Near East. The twenty-nine contributors represent a broad range of scholarly disciplines seeking answers to fundamental questions regarding the patterns and commonalities of this vital aspect of the past. How was the experience construed and by what means was it achieved? Who was involved? Where and when were rites carried out? How was it reflected in pictorial arts and written records? What was its relation to other components of the sociocultural compact? In proposing responses, the authors draw upon a wealth of original research in many fields, generating new perspectives and thought provoking, often surprising conclusions. With their abundant cross-cultural and cross-temporal references, the chapters mutually enrich each other and collectively deepen our understanding of ecstatic phenomena thousands of years ago. Another noteworthy feature of the book is its illustrative content, including commissioned reconstructions of ecstatic scenarios and pairings of works of Bronze Age and modern psychedelic art. Scholars, students and other readers interested in antiquity, comparative religion and the social and cognitive sciences will find much to explore in the fascinating realm of ecstatic experience in the ancient world.

The Shamaness in Asia Davide Torri, Sophie Roche, 2020-10-08 This book concentrates on female shamanisms in Asia and their relationship with the state and other religions, offering a perspective on gender and shamanism that has often been neglected in previous accounts. An international range of contributors cover a broad geographical scope ranging from Siberia to South Asia and Iran to Japan. Several key themes are considered, including the role of bureaucratic established religions in integrating challenging and fighting shamanic practices, the position of women within shamanic complexes and perceptions of the body.

Beginning with a chapter that places the shamaness at the centre of the discussion chapters then approach these issues in a variety of ways from historically informed accounts to presenting the findings of extensive ethnographic research by the authors themselves Offering an important counterbalance to male dominated accounts of shamanism this book will be of great interest to scholars of Indigenous Peoples across Religious Studies Anthropology Asian Studies and Gender Studies
