American Nation Holt Rinehart & Winston, 2001-10 The Internet Is Not the Answer Andrew Keen, 2018-09-01 The renowned Internet commentator and author of *How to Fix the Future* exposes the greed egotism and narcissism that fuels the tech world Chicago Tribune The digital revolution has contributed to the world in many positive ways but we are less aware of the Internet's deeply negative effects The Internet Is Not the Answer by longtime Internet skeptic Andrew Keen offers a comprehensive look at what the Internet is doing to our lives The book traces the technological and economic history of the Internet from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity In this sharp witty narrative informed by the work of other writers reporters and academics as well as his own research and interviews Keen shows us the tech world warts and all Startling and important The Internet Is Not the Answer is a big picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant unforeseen aftershocks Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values He is not an opponent of Internet culture he is its conscience and must be heard Po Bronson 1 New York Times bestselling author The National and English Review, 2013 *Somebody Should Do Something* Michael Brownstein, Alex Madva, Daniel Kelly, 2025-09-16 A novel and scientific approach to creating transformative social change and the surprising ways that each of us can help make a real difference Changing the world is difficult One reason is that the most important problems like climate change racism and poverty are structural They emerge from our collective practices laws economies history culture norms and built environments The dilemma is that there is no way to make structural change without individual people making different more structure facing decisions In *Somebody Should Do Something* Michael Brownstein Alex Madva and Daniel Kelly show us how we can connect our personal choices to structural change and why individual choices matter though not in the way people usually think The authors paint a new picture of how social change happens arguing that our most powerful personal choices are those that springboard us into working together with others warehouse worker Chris Smalls's unionization at Amazon is one powerful example Taking inspiration from the writer Bill McKibben they stress how one important thing an individual can do is be somewhat less of an individual Organized into three main parts the book first diagnoses the problem of either or thinking about social change which stems from the false choice of making better personal choices or changing the system Then it offers a different way to think about social change anchored in a new picture of human nature emerging across the social sciences Finally the authors explore ways of putting this picture into practice Neither a how to manual nor an activist's guide *Somebody Should Do Something* pairs stories with

science plus some jokes to help readers recognize their own power turning resignation about climate change and racial injustice into actions that transform the world
