Economies of Agglomeration Fouad Sabry, 2024-01-19 What is Economies of Agglomeration One of the major subfields of urban economics economies of agglomeration explains in broad terms how urban agglomeration occurs in locations where cost savings can naturally arise This term is most often discussed in terms of economic firm productivity However

agglomeration effects also explain some social phenomena such as large proportions of the population being clustered in cities and major urban centers. Similar to economies of scale, the costs and benefits of agglomerating increase the larger the agglomerated urban cluster becomes. Several prominent examples of where agglomeration has brought together firms of a specific industry are Silicon Valley and Los Angeles being hubs of technology and entertainment respectively in California, United States, and London, United Kingdom, being a hub of finance.

Tax Policy and the Economy, Volume 28 Jeffrey R. Brown, 2014-11-05 The papers in Volume 28 of *Tax Policy and the Economy* illustrate the depth and breadth of the research by NBER research associates who study taxation and government spending programs. The first paper explores whether closely held firms are used as tax shelters. The second examines the taxation of multinational corporations. The third discusses the taxation of housing, focusing on the ways in which current income tax rules may affect location and consumption decisions and lead to economic inefficiencies. The fourth paper offers an historical perspective on the political economy of gasoline taxes, with a particular focus on the response to the oil shocks of the early 1970s. The fifth and final paper uses the tools of financial economics to estimate the unfunded liabilities of the Pension Benefit Guaranty Corporation.

The Routledge Handbook of Housing Economics Kenneth Gibb, Chris Leishman, Alex Marsh, Geoffrey Meen, Rachel Ong Vifor Jr, Craig Watkins, 2024-02-29 The *Routledge Handbook of Housing Economics* brings together an international panel of contributors to present a comprehensive overview of this important field within economics. Housing occupies an increasingly central role in modern society, dominating consumer assets and spending, forming an important part of social policy, and being a large enough market to impact the macroeconomy. This handbook tackles these themes along with other critical issues such as intergenerational housing inequality and the efficiency and social justice of housing interventions. This volume is structured in four main parts. It starts with eight chapters in microeconomics and housing. This is followed by two shorter sections on macroeconomics and finance. The final main part of the book is concerned with eight chapters on policy dimensions. While many of the chapters are rooted in mainstream economics and finance applied to housing, there are also

chapters stressing institutional behavioural and political economy orientations as well as those that explicitly challenge more mainstream accounts The contributing authors are based in Europe North America and Australia and all draw in international literature to provide state of the art reviews of their topics This carefully curated handbook will be essential reading for advanced students researchers and policy makers in housing economics urban economics urban planning public economics and real estate economics and finance Chapter 22 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Urban Complexity and Planning Shih-Kung Lai, Haoying Han, 2016-02-17 In recent years there has been a new understanding of how cities evolve and function which reflects the emergent paradigm of complexity The crux of this view is that cities are created by differentiated actors involved in individual small scale projects interacting in a complex way in the urban development process This bottom up approach to urban modeling not only transforms our understanding of cities but also improves our capabilities of harnessing the urban development process For example we used to think that plans control urban development in an aggregate holistic way but what actually happens is that plans only affect differentiated actors in seeking their goals through information In other words plans and regulations set restrictions or incentives of individual behaviour in the urban development process through imposing rights information and prices and the analysis of the effects of plans and regulations must take into account the complex urban dynamics at a disaggregate level of the urban development process Computer simulations provide a rigorous promising analytic tool that serves as a supplement to the traditional mathematical approach to depicting complex urban dynamics Based on the emergent paradigm of complexity the book provides an innovative set of arguments about how we can gain a better understanding of how cities emerge and function through computer simulations and how plans affect the evolution of complex urban systems in a way distinct from what we used to think they should Empirical case studies focus on the development of a compact urban hierarchy in Taiwan China and the USA but derive more generalizable principles and relationships among cities complexity and planning

Distributional Effects of Environmental and Energy Policy Don Fullerton, 2017-05-15 Many effects of environmental and energy policy are likely to disproportionately burden those with low income First it raises the price of fossil fuel intensive products that constitute a high fraction of low income budgets like gasoline heating fuel and electricity Second the handout of pollution permits to firms provides value to those who own them Third low income individuals may place more value on food and shelter than on improvements in environmental quality so high income individuals may get the most benefit of pollution abatement Fourth air quality improvements may raise the value of houses owned by landlords rather than helping renters These effects might all hurt the poor more than the rich This book brings together the seminal economics literature that studies whether these fears are valid and whether anything can be done about them

Revealed Preference Approaches to Environmental Valuation Volumes I and II Catherine L. Kling, 2019-01-22 In this two volume collection the editors have chosen a sample of some of the most essential and inspirational articles and papers for understanding revealed preference methods to value environmental amenities The papers cover the gamut of methods that are typically classified as revealed preference approaches including recreation demand models hedonic methods and averting behavior methods as well as efforts to combine stated and revealed preferences While this collection is far from exhaustive the editors have included papers they believe will represent the state of the art in the theory and application of revealed preference methods contribute to development of the state of the art or raise fundamental challenges and insights that will drive the research agenda in the coming years

Planning within Complex Urban Systems Shih-Kung Lai, 2020-12-17 Imagine living in a city where people could move freely and buildings could be replaced at minimal cost Reality cannot be further from such Despite this imperfect world in which we live urban planning has become integral and critical especially in the face of rapid urbanization in many developing and developed

countries This book introduces the axiomatic experimental approach to urban planning and addresses the criticism of the lack of a theoretical foundation in urban planning With the rise of the complexity movement the book is timely in its depiction of cities as complex systems and explains why planning from within is useful in the face of urban complexity It also includes policy implications for the Chinese cities in the context of axiomatic experimental planning theory *Research Handbook on Housing, the Home and Society* Keith Jacobs, Kathleen Flanagan, Jacqueline De Vries, Emma MacDonald, 2024-08-06 This dynamic Research Handbook explores key perspectives topics and methodologies used to understand housing the home and society Pairing social theory with a broad range of case studies from the Global North and South it offers a unique insight into the field
