Dumas, Beth A. Loring, 2008-04-09 Moderating Usability Tests provides insight and guidance for usability testing To a large extent successful usability testing depends on the skills of the person facilitating the test However most usability specialists still learn how to conduct tests through an apprentice system with little formal training This book is the resource for new and experienced moderators to learn about the rules and practices for interacting Authors Dumas and Loring draw on their combined 40 years of usability testing experience to develop and present the most effective principles and practices both practical and ethical for moderating successful usability tests The videos are available from the publisher s companion web site Presents the ten golden rules that maximize every session s value Offers targeted advice on how to maintain objectivity Discusses the ethical considerations that apply in all usability testing Explains how to reduce the stress that participants often feel Considers the special requirements of remote usability testing Demonstrates good and bad moderating techniques with laboratory videos accessible from the publisher s companion web site **E-Commerce and Web Technologies** Giuseppe Psaila, Roland Wagner, 2007-08-21 This book constitutes the refereed proceedings of the 8th International Conference on Electronic Commerce and Web Technologies EC Web 2007 held in Regensburg Germany September 2007 in conjunction with DEXA 2007 It covers recommender systems business process design aspects mobile commerce security and e payment Web services computing semantic Web e negotiation and agent mediated systems and issues in Web advertising Readercentric Writing for Digital Media David Hailey, 2016-12-05 This book presents an altogether new approach to writing and evaluating writing in digital media It suggests that usability theory provides few tools for evaluating content because usability theory assumes only one kind of writing on the Internet The author suggests three models user centric usability model persuasion centric encouraging the reader to linger and be persuaded Canon camera ads

and quality centric encouraging the reader to linger and learn or be entertained because of the quality of the writing NASA gov and YouTube Designed for professional writers and writing students this text provides a rubric for writing in digital media but more importantly it provides a rubric and vocabulary for identifying and explaining problems in copy that already exists The Internet has become a pastiche of cut and paste content often placed by non writers to fill space for no particular reason or by computers with no oversight from humans e g Amazon com Because these snippets are typically on topic but often for the wrong purpose or audience professional writers have difficulty identifying the problems and an even harder time explaining them Finding an effective tool for identifying and explaining problems in digital content becomes a particularly important problem as writers increasingly struggle with growing complications in complex information systems systems that create and manage their own content with little human intervention Being able to look at a body of copy and immediately see that it is problematic is an important skill that is lacking in a surprising number of professional writers
