The Digital Social Alpha Possamai-Inesedy, Alan Nixon, 2019-12-02 The edited volume aims to present a critical analysis of the current state of research on religion and belief systems in the realm of the Digital Social The rapid expansion and democratization of digital technologies in conjunction with the significant shifts taking place within the practices of religion and belief through digital technology demand a critical examination across the social sciences and humanities These changes call for an overview of not only our current methodological tool box but also the epistemological and ethical considerations that researchers must contend with The proposed volume provides a critical framework that recognizes that the social and therefore the religious cannot be fully understood without recognizing how the digital world actively constitutes notions such as identity social networks embodiment and social institutions While some specific methods will be discussed the volume s emphasis remains on the critical epistemological and logistical considerations that are needed when undertaking this form of research

Ethics in Pharmacy Practice: A Practical Guide Dennis M. Sullivan, Douglas C. Anderson, Justin W. Cole, 2021-06-16 This textbook offers a unique and accessible approach to ethical decision making for practicing pharmacists and student pharmacists Unlike other texts it gives clear guidance based on the fundamental principles of moral philosophy explaining them in simple language and illustrating them with abundant clinical examples and case studies The strength of this text is in its emphasis on normative ethics and critical thinking and that there is truly a best answer in the vast majority of cases no matter how complex The authors place high trust in a pharmacist s moral judgment This teaches the reader how to think based on ethical principles not necessarily what to think This means navigating between the two extremes of overly theoretical and excessively prescriptive The cogent framework given in this text uses the language of competing duties identifying the moral principles at stake that create duties for the pharmacist This is the balancing act of normative ethics and of deciding which duties should prevail in a given clinical situation This work presents a clear cut pathway for resolving ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Presents a clear cut pathway for resolving the ethical dilemmas encountered by pharmacists based on foundational principles and critical thinking Jon E Sprague RPh PhD Director of Science and Research for the Ohio Attorney General

Issues in Web-Based Pedagogy Robert A. Cole, 2000-06-30 There has been an explosion of Web based courses in higher education Aiming at an interdisciplinary audience the contributors draw upon diverse philosophical and empirical backgrounds to make claims about Web based pedagogy Among the points they raise is the concern that education is more easily commodified through Internet technologies implying that traditional faculty roles in teaching and research are at risk Moreover current understandings of what it means to be a teacher or a student are undergoing redefinition as a result of these new distance learning technologies The contributors note that Web based pedagogy is associated with sound instruction when particular strategies are adopted As a corollary this form of teaching is least effective when attempts are made to directly translate traditional styles of teaching Political social and economic interests are competing to shape the direction that online education will take The authors argue that opportunities exist for administrators and faculty to define the terms under which Web based learning will occur in their institutions
