Choosing Faith John W. Saultz,2019-05-16 A belief is a judgment that we assume to be true when making life decisions Our beliefs cannot conclusively be proven true or false Beliefs can be as simple as our preference for food or as profound as our religious beliefs How are beliefs different from knowledge or opinion How do beliefs develop and change over time and how do they become the foundation of our purpose in life This book is divided into three sections The first explains how beliefs are formed in childhood and modified and adapted when we become adults The second section explores different types of belief and introduces the notion of moral beliefs about right and wrong and religious beliefs about the existence and nature of God The final section of the book explains how beliefs are prioritized into a faith that becomes our framework for making life decisions The beliefs we hold most dear form the building blocks of our purpose in life We have the freedom to choose our beliefs so we have the freedom to choose our purpose The goal of this book is to help the reader think deeply about this process and explore the meaning of this freedom *Resources in Education* ,1980

The Law as a Behavioral Instrument Gary B. Melton, 1986-01-01 The effect of the law on human behavior is contemporary society nothing less is the concern of this important book It is curious that scholars in psychology and law have largely neglected this topic because studies of the effects of law on behavior may have much to teach about the role of social regulation in human motivation more generally Similarly such studies may offer jurisprudential scholars new ways of thinking about the role of law in human experience Here seven leading experts on law and the social sciences discuss the contributions their research can make to the legal system Concerned with the relationship between the law and both individual and group behavior they examine the law as an instrument of social stasis and social change and as an element of personal motivation The result is a major step toward the development of a psychology of jurisprudence The scope of this book is in the best tradition of the Nebraska Symposium on Motivation and a fitting celebration of the tenth anniversary of the University of Nebraska Lincoln s Law Psychology Program the first integrated graduate training program in psycho legal studies Drawing from law anthropology sociology psychology and philosophy the contributors take a truly interdisciplinary approach to understanding the instrumentality of law
