Maxwell, 2017-02-13 Focused on The Holocaust in an Age of Genocide Remembering for the Future brings together the work of nearly 200 scholars from more than 30 countries and features cutting edge scholarship across a range of disciplines amounting to the most extensive and powerful reassessment of the Holocaust ever undertaken In addition to its international scope the project emphasizes that varied disciplinary perspectives are needed to analyze and to check the genocidal forces that have made the Twentieth century so deadly Historians and ethicists psychologists and literary scholars political scientists and theologians sociologists and philosophers all of these and more bring their expertise to bear on the Holocaust and genocide Their contributions show the new discoveries that are being made and the distinctive approaches that are being developed in the study of genocide focusing both on archival and oral evidence and on the religious and cultural representation of the Holocaust *Time Travel in Popular Media* Matthew Jones, Joan Ormrod, 2015-03-18 In recent years numerous films television series comic books graphic novels and video games have featured time travel narratives with characters jumping backward forward and laterally through time No rules govern time travel in these stories Some characters move by machine some by magic others by

unexplained means Sometime travelers can alter the timeline while others are prevented from causing temporal aberrations The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the 19th century What is behind our fascination with time travel What does it mean to be out of one's own era How do different media tell these stories and what does this reveal about the media's relationship to time This collection of new essays the first to address time travel across a range of media answers these questions by locating time travel narratives within their cultural historical and philosophical contexts Texts discussed include Doctor Who The Terminator The Georgian House Save the Date Back to the Future Inception Source Code and others

Walter Benjamin _l_ Fr dlander, Eli Friedlander, 2012-01-15 Walter Benjamin is often viewed as a cultural critic who produced a vast array of brilliant and idiosyncratic pieces of writing with little more to unify them than the feeling that they all bear the stamp of his unclassifiable genius Eli Friedlander argues that Walter Benjamin's corpus of writings must be recognized as a unique configuration of philosophy with an overarching coherence and a deep seated commitment to engage the philosophical tradition Friedlander finds in Benjamin's early works initial formulations of the different dimensions of his philosophical thinking He leads through them to Benjamin's views on the dialectical image the nature of language the relation of beauty and truth embodiment dream and historical awakening myth and history as well as the afterlife and realization of meaning Those notions are articulated both in themselves and in relation to central figures of the philosophical tradition They are further viewed as leading to and coming together in The Arcades Project Friedlander takes that incomplete work to be the central theater where these earlier philosophical preoccupations were to be played out Benjamin envisaged in it the possibility of the highest order of thought taking the form of writing whose contents are the concrete time bound particularities of human experience Addressing the question of the possibility of such a presentation of philosophical truth provides the guiding thread for constellating the disparate moments of Benjamin's writings
