Yegidis, Robert W. Weinbach, 2002 This research methods text for social work is accessible to students in level and writing style and its paperback format makes it less expensive than most texts on the market The authors are social work instructors who understand the realities of social work practice and have included many social work practice examples The text is ideal for a one semester or quarter research methods course for undergraduate or graduate students with little or no prior knowledge of research In response to reviewers and students the fourth edition infuses content in three major areas First qualitative research methods are discussed and appropriate examples are offered throughout the book not just in a single chapter Secondly research to evaluate practice while still the focus of the last two

chapters is discussed alongside research for building a professional knowledge base at many points throughout the text Third discussion of ethical issues appears in many other places besides Chapter 2 It receives special emphasis in the discussions of program evaluations and single system research Critical Reflexive Research Methodologies ,2023-11-07 While all oppressions are equal some are more equal than others This statement borrowed from George Orwell s *Animal Farm* and written and marinated to fit within and without our call for ethical research helps us to see how contemporary research processes are singular and fail to account for the complex histories realities and values of marginalized communities Such a failure to account and re member has had massive symbolic and material consequences on marginalized communities illustrated by the number of deaths we continue to witness everyday Those deaths have been sanctioned and authorized by the ways in which we come to know what we know and how that is imprinted in our policies and everyday existence This book looks at knowledge production as a process of giving an account of those losses in ways that help knowledge production to be a mechanism of remembering cognitive and re membering communi ty or bring together solidarity a form of epistemological and ontological demonstration Ethical knowledge production becomes a process of relationship that remembers the histories values and realities of people in ways that are transformative and political Such an expression fails to arrive at an end and rather recognizes knowledge production as endless production of knowledge Such a process goes against neoliberal mechanism of commodifying knowledge for sale in the market This edited collection attempts to engage with current qualitative research methodologies and approaches from a critically and ethically reflexive standpoint This work seeks to unravel colonial practices that continue to hide within qualitative approaches in ways that invite a new reimagining of working within and without qualitative method ologies This edited collection therefore seeks to bring to the fore the lived experiences of the studied to their storied life in ways that are ethically and politically congruent This work therefore seeks to bring forth Foucault s subterranean narratives steeped in contexts and experiences that can critically invert the dominant colonial capitalist state practices in existing research
