Research Paper, 1988 *HumRRO Professional Paper 9-73; a Comparison of Computerized Techniques for Recognizing Spanish Names* United States Department of the Army, 1973 **Scientific Papers Made Easy** Stuart West, Lindsay Turnbull, 2023-01-30 Writing scientific publications is a fundamental step in the research process Furthermore as science becomes more interdisciplinary and the number of journals continues to expand individual papers increasingly need to stand out to be read and have any form of impact It is widely assumed that students and early career scientists will simply acquire the necessary expertise However this could not be further from the truth many early career scientists find writing both intimidating and overwhelming writing is a skill that needs to be learnt and actively developed This novel book's fundamental principle is simple the reader must come first The purpose of a scientific paper is to pass on knowledge and so impactful writing must focus on attracting holding and illuminating readers The authors demonstrate how just a few simple pointers can significantly improve both writing quality and impact They tackle each component of a paper in turn providing a simple framework that makes clear what needs to be included and what doesn't and in what order They also provide advice for writing up different types of science from laboratory experiments to theoretical modelling The focus throughout is on the need to use simple jargon free English and to assume that the reader has little or no prior knowledge In summary the book is about writing better scientific papers that are more likely to be read and have impact **Scientific Papers Made Easy** is targeted at a broad audience of students and professionals across the biological life and human sciences It uses simple biological and human examples that assume no prior knowledge and will resonate with any scientist

McGregor, 2017-10-25 Understanding and Evaluating Research A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question the use of theory in the study the methods used and how the outcomes are reported The book starts with what it means to be a critical and uncritical reader of research followed by a detailed chapter on methodology and then proceeds to a discussion of each component of a research article as it is informed by the methodology The book encourages readers to select an article from their discipline learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report

Learning from Comparing: new directions in comparative education research Robin Alexander, Patricia Broadfoot, David Phillips, 1999-01-01 Learning from Comparing is a major two volume study which reassesses the contribution of comparative educational research and theory to our understanding of contemporary educational problems and to our capacity to solve them At a time when educational research is under attack on the grounds

of bias and irrelevance and under pressure to address only those questions which are acceptable politically as good a definition of bias as any this is a serious attempt to bridge the worlds of research policy and practice The editors have put together a collection in terms of both perspective and nationality which ensures contrasting viewpoints on each topic

International Comparisons of China's Technical and Vocational Education and Training System Zhenyi

Guo,Stephen Lamb,2010-07-03 China is experiencing an unprecedented phenomenon breakneck industrialization on a scale and at a pace not seen before It is trying to achieve in just a few decades what Western nations took more than a century to do The arrival in the country s cities of tens of millions of rural dwellers at most semi skilled has put huge strain on the country s system of vocational education known as TVET How have the Chinese authorities and their education administrators responded Is China s TVET system adapting to the rapidly evolving needs of its industry Using the province of Yunnan as a subject this detailed case study is a closely argued and sanguine analysis of the operation of TVET in China The authors deployed a set of internationally comparable criteria to offer a searching assessment of current performance at the same time documenting areas of strength and weakness The question the authors methodology answers is how well China s TVET system is performing compared to technical and vocational education structures in other countries In fact they discover that in Yunnan a province representative of the challenges faced nationwide much has indeed been done from a wholesale overhaul of programs to make them relevant to industry requirements to major investment in infrastructure Teacher training has been reformed and take up of professional master s and doctoral courses has been encouraged Joint initiatives with bodies such as UNESCO have improved training and vocational education at high school level While there is a strong international history of such comparative evaluations which are essential for policy makers to benchmark their administration few studies have included China despite the enormous amount of value that can be learned from that country s experience This work will provide vital material for researchers governments and development agencies alike
